OFFICE OF STUDENT AFFAIRS

June 29, 1972

To Members of the Class of 1972

I feel compelled to comment on this year's CAULDRON because of the failure of the editors to live up to their responsibility to the Class of 1972. This Class has had an outstanding record during its five years at Northeastern and deserves a much better yearbook. The student editors were charged with the task of compiling a record of the individual members of the Class and their collective campus experiences. The considerable accomplishments of this Class academically, in hundreds of student activities, clubs and programs, and on the athletic field, warrant treatment and coverage far beyond that given by the editors.

Since the CAULDRON is a student publication, and the student editors are responsible for its content and makeup, neither the faculty adviser nor the administration review and pass upon the content prior to publication. The University has conscientiously complied with the Joint Statement on Rights and Freedoms, and I defend the right of students to operate without censorship. We have never, however, relinquished the right to criticize and evaluate the work of our student editors. In my judgment, the editors of this edition of the CAULDRON have not manifested either the professional competence, or that spirit of responsibility which we have a right to expect.

This edition of the CAULDRON is loaded with technical flaws. Many photographs are of poor quality, others wrongly labelled. The chaotic arrangement of photos of graduating seniors makes the book almost unusable for reference purposes, since many pages are not numbered. Much more fundamentally, I am distressed by the contempt the editors have shown for their classmates, the faculty and administrators of the University. They have made obscene and insulting attacks on fellow seniors and administrators; the faculty is practically ignored. The Student Activities section occupies only five pages out of three hundred and seventy-six, and only eight pages are devoted to varsity sports.

May I express my sincere regrets that this publication does not measure up to the high standards which have been established in the past. You may be assured that we will make every effort to improve the quality of the CAULDRON in coming years. If we are to preserve the freedoms of future CAULDRON editors, we must provide them with clearer guidelines and better understanding of the expectations of the groups they represent. I would appreciate your frank opinion not only of these brief comments of mine, but your assessment of your CAULDRON. Your letters can be sent to me at the University and will serve as important guides to those of us concerned with the quality of student publications.

Sincerely,

Gilbert G. MacDonald

Thanks

Our special thanks must go to those people and publications whose excellent photos and cartoons made this publication whatever it is. Time, Life, and Look deserve prime credit, not only for allowing us one-time use of their photos, but for covering the included events so well. In some cases the photos are the property of individual photographers, each of whom we thank for his/her individual contribution. Only through their efforts could we adequately capture the events of these five years.

The Record American, The New York Daily News, The Boston Globe, World Wide Photos, Associated Press, United Press International, The Chicago Sun-Times, the LBJ Library, The Offices of the President and the Vice-President, The Boston Herald Traveller, Avco Embassy Pictures, The New York Times, and all the others—our official thanks, blessings and gratitude.

To Paul Szep, Oliphant, and the others, our thanks not only for the use of their work, but for their cartoons in the first place as a welcome relief from and proper perspective on, the world,

June and the Windsor Tap Room have kept us alive and in good (?) humor, and for such (and the ever hot rolls) deserve a separate note. Abnormal Service Awards go to the Typing Trio (LL&B) and Mama Michelle, of the restaurant. To that master of the cutting remark, the Kronachrome Kid, Myron D. Burtman goes a subscription to Newsweek and a box of industrial blades.

Our thanks also to the senior class for their disinterest and lack of concern, for not filling in the senior statement forms, for not checking with us if they missed deadlines, for taking no active interest in this volume to the extent that we were free to make this a book that will have value to us at least. Fortunately, most of you fuckers will never see this. Has anyone ever died of apathy?

Special and final thanks must go to Dean Harvey Vetstein, for being a guide to the realities without being a barrier to the imagination. (Raoul-he lives!) To all who gave of their time and talent and are not specifically mentioned, to all who helped this live and grow, thank you. Ed.

Northeastern University

September 11, 1967

It is a privilege to extend greetings to the Class of 1972 and to welcome you to Northeastern University.

As students at Northeastern, you will participate in a unique form of higher education. A degree from Northeastern represents all of the academic studies taught in the traditional four-year college, in addition to professional experience in the field of your choice. The result is a superior education characterized by a strong sense of career motivation.

During this week, you will be enrolling in specific colleges, courses and curricula. In doing so, you are signing up, in the larger sense, for full participation in the experiences of college life. Soon you will be associating with students from different parts of the country and from overseas nations as well. You will be exposed to faculty members of diverse and opposing points of view. You

ASA S. KNOWLES, President

will be asked to assume a degree of responsibility such as you may never before have known. There is no academic credit given for the education that will result from these experiences, but success on the college campus, in and out of the classroom, can determine the pattern of a lifetime. Much will depend on the competency and maturity with which you conduct your affairs.

You are beginning your education in an age of great opportunity. Many career fields are open only to the college graduate. Although our nation places a great premium on education, it expects much of its educated men and women in return. As graduates of this University, you will be richly endowed with the ability to serve mankind. May God guard and guide your individual paths to excellence.

"Hello Mudda"

By Kristen Kingsbury

Dear Mommy and Daddy,

Well, I've almost made it through orientation week, and so far I haven't flunked anything, so you can be very proud. I did cry after you left Sunday, but then I remembered you forgot to give me some more money, and I really cried! I need some more money for books; I must have a copy of Pat Boone's latest book about teenagers; a set of Hymarx outlines for my courses; and a copy of A New Approach to Sex written by one of the professors here. Also, you forgot to leave my hatbox of Clearasil, and I'll be lost without it! Furthermore, I only brought I9 stuffed animals, and a girl down the hall has 23, so send 5 more IMMEDIATELY!

I made a hit at my first fraternity party . . . I blocked a forward pass from a football player with the 'old brick-in-the-purse' trick you taught me, Mom. I didn't hurt him much, because he has played a lot of football without a helmet. The reason I hit him was, he asked me if I'd like to look around the fraternity house, and when I declined, he tried to persuade me with a rabbit punch to my Adam's apple. (Since I repulsed his advances, many upperclassmen have told me that I shouldn't have done it, because 'Killer' is actually the suavest man on campus, and the others were real rough types.)

You were right. The food in the dorm is actually quite inexpensive. It's the antidotes that cost. Please send an extra fifty beans for next week's remedies.

Our dorm counselor told us in a meeting that the dorm would be "a second home" to all of us, and my roommate said it was a second home to her, but then her first home was the Bridgewater Home for the Criminally Insane.

Oh, before I forget, send me some more underwear. I kinda' lost my head during the panty raid last night (It took place on the corner of Huntington and Mass. Avenues . . . in Joe and Nemo's, of all places!), and now I need a few more sets of everything, including chartreuse dress shields.

Rest assured. My roommate and I are taking full advantage of the cultural opportunities offered in Boston. Why, only last night we went into town and saw a real 'art' film at the Sailor Sinema. Erich Von Zipper played the lead male role, and Lolita La Fong the female. It was really a good show, but when it was half over, my roommate disappeared, and I had to run home alone. She's kind of funny . . . always wears sneakers and a coin changer. When I ask her why, she says, "Tuition." She's really nice and says she'll show me some 'ropes' some day.

Oh, we've had a few mixers so far, and am I discouraged! There was no one from Harvard there . . . just a lot of guys with "Clean-Rite" written on their jackets. I hope you won't get mad, Daddy, but I guess you'll have to round up second term's tuition after all . . . I can never be married by Thanksgiving. (Maybe by Christmas if I can 'tame' this unruly nasal hair.)

Oh, please don't forward my copies of Presbyterian Life! Get me a subscription to something more intellectual, like Seventeen, or Modern Romances. And under no circumstances send me any more letters with "Mommy and Daddy Love You" on the envelope. I don't want to get any more horse laughs (There really is a girl here who looks like a Clydesdale... she used to pull the Budweiser Beer wagon until she bit Ed McMahon.)

Do you remember the nice fellow who helped me move

McLellan blasts "apathetic" council

"Student government at Northeastern University, specifically the Student Council, is sick," said Virgent Interview of the Student Council, is sick, and Virgent Interview with the NEWS, Wednesday, which was the student of the Student Interview with the NEWS, Wednesday, "The council is agathetic. It reachs when it should act, quables when it should discuss, and it's not even producing results," he continued. "The same few people are doing all the work and I'm sick of it.

"The council has tremendous opportunities at of projects. Bot the majority of the councilions during he past two terms have been largy, apathetic, it responsible, and completely sterile of Ideas. "Council representatives," he said, "are elected to work—to represent the interests and desires of the council of the said, "are elected to work—to represent the interests and desires of the central student body. This Student Council, by and Initiative and responsibility have been saidly lacking. The council has developed tremendously in the past five years, but, if it goes through another term like the last two, it'll rain the great opportunity for the students to have a vital voice at Northeastern."

By BOB MATORIN

Responding to a question as to what the council can and should do to alleviate the problems be claims exist. McLellan said, "That's an easy question to answer. Each councillor should face up to the question, 'Am I willing to spend the time and effort to make student government the effective voice it should be at Northesstern."

"If the answer is yes, let them wake up and be-come activists. If the answer is no, let them get the hell off the council and make room for someone willing to shoulder the burden, It's about time these kids took a good look at themselves and the work they've been doing. For most of them, there won't be much

"I'd like to emphasize," he pointed out, "that this isn't a blanket indictment. Some kids have been working long hours on projects such as setting up the faculty-course evaluation, hammering out a uniform class constitution, and researching and formulating

The Draft Is No Answer to Dissent

If there is one man who ought to know all there is to know about the Selective Service system, it is Lt. General Lewis B. Hershey, director of the draft since 1941. By his latest directive to local hoards, though, the general seems to indicate that he has lost track of where the draft fits into the American constitutional system.

Bothered by eampus anti-Vietnam war protests, Hershey has advised local boards to withdraw deferments and immediately draft students who interfere with the draft or campus military recruiters. Hershey's outrage at the form some campus protests have taken is understandable. But his illconsidered suggestion that draft boards become, in effect, prosecutors and juries must be ruled out of order.

The American Association of University

Professors asked Hershey to rescind his directive, pointing out that it "sets down such a vague standard that local hoards may induct persons for the exercise of constitutional rights. The mere existence of this undefined power to use the draft as a punitive instrument must therefore have a chilling effect upon academic freedom and free speech and assembly as guaran-teed by the First Amendment."

A group of congressmen branded Hershey's plan "a flagrant denial of due process clearly designed to repress dissent against the war in Vietnam.

A student does not lose his right to dissent simply hecause his military service has been deferred. By the same token, a student is as liable as any other American to the penalties that apply to trespasses

and disorders that overstep legal bounds. Whether or not General Hershey rescinds his directive before it reaches a

court test, he has done a disservice to the Selective Service system he helped found. The draft, with all its imperfections, is the best system we have yet been able to devise to choose those men who will represent us all by serving when not all ablebodied men are needed.

To use the draft as a form of punishment is to suggest to the men in Vietnam -where draftees make up 37% of the Army troops—that their units are also handy as penal battalions. The suggestion is demeaning to the armed services—even if some draftee veterans of Vietnam might understandably like to have a hand in the basic training of drafted dissenters.

An Inter-Fraternity Council spon-sored student Vietnam War referendum will be held all day today in the commons exhibition area.

"We also intend to forward the results to President Johnson," he said.

According to Frielich, Boston newspapers intend to publish the results of the Northeastern poll.

Frielich commented that the poll di-rectly concerned the Vietnam war rather than the question of open campus recruiting because "the student council has indicated that it will hold a poll on this issue before the end of the term.

President Knowles Speaks Out:

ROTC Belongs On Campus

Under present world conditions it seems essential that the United States maintain a large and effective military establishment. Failure to do this would be to risk the loss of our hard won freedoms. Military forces such as are needed to defend our democracy today require substantial numbers of officers who must be trained in service academies operated by the federal government, in officer candidate schools, or in ROTC programs in civilian colleges. Students who com-plete ROTC curricula receive commissions either in the regular army or in the reserve forces at the time of their graduation from college. Choice of a commission as a regular army officer is at the option of the individual student provided that he qualifies.

Less than one quarter of the military officers commissioned each year are the product of service academies or officer andidate schools. The remaining three nuarters of the total number commissioned are the product of ROTC programs conducted in some 250 civilian colleges and universities throughout the Jnited States. This arrangement suits admirably the requirements of a demoeratic society not desiring to establish a dominant military class and conforms to the fundamental principle of having citizen soldiers controlled by the citizenry.

Northeastern University's Department of Military Science was established in 1951 and has been an integral part of in 1951 and has been an integral part of education programs in the Basic College ever since. Officers assigned by the Army to administer the ROTC program at Northeastern (with prior approval of the President of the University) have been carefully selected, well educated men, personally qualified for service in a university community, who have shared helpfully, in student and faculty affairs. They have worked hard passible wor

The ROTC pro-vides opportunities of interest to students from different backgrounds and with widely varying academic interest, but no student at Northeastern University is required to enroll in courses offered by the Department of Military Science. The basic ROTC program is populated en-tirely by volunteers and is offered during the first two years. Students are free to withdraw from the ROTC at the end of the basic program if they so desire. Those who elect and are admitted to the advancer you ses offered during the final three yes s of the baccalaureate curricula accorde a knowledge of military matters and a training in leadership which equip them to become officers in the United States Army. The Department of Military Science is an academic de-partment of the University and appropri-ate academic credit is granted for the

The program has many specific advantages for students who are enrolled. They receive regular compensation at the rate of \$50 per month while they are in rate of Sou per month while they are in training. An extensive and generous scholarship program providing both 4-year and 2-year scholarships for ROTC cadets has recently been established by the Department of the Army. Several Northeastern cadets have been recipients of these awards

In last week's issue of The NEWS it was stated that "Martin ... offered no apology for his past involvements." I wish to state that I do not believe that any 'apology' is necessary for these involve-

eastern between what is said and what is done. Two years ago a number of highly placed University officials had gone on record as advocating the principle of academic freedom, but from my own frustrating and hitter experience I had come to know that, while principles may be highly praised by certain University officials, anyone attempting to put those principles into practice stood in danger of severe reprisals.

of severe reprisals.

There are principles of conduct and of academic integrity that I believe in strongly. And I believe in them strongly enough to flight for them. I have only too frequently observed here at Northeastern in classrooms and in public policy statements about freedom of expression, and freedom of inquiry, that members of the University community will make high-sounding statements about academic freedom, and then cynically and maligaontly work to subvert in private what they have advocated in public. During the six years that I have been at North-

ver in private what they have advocated in public. During this ix years that I have been at North-settern I have found this to be particularly true of members of the Department of English. At North-sesters there are many departments in which this is not Irws, and at Northseaters thate are many in the public and a third that the public is not all the public and private wherease and action can be specified.

But in the Department of English the whole dis-mal and unenlightened attitude that prevails can be quite clearly seen in the statement that The NEWS quoted of Acting-Chairman Marston: "What-NEWS quoted of ActingChairman Marston: "What-ever our idealistic concepts of the nature of a uni-versity we must swallow the fact that a university is a organized business, like General Motors. . If a worker in any business is displeased with his wage or rate or promotion, or with the regulations, phil-osophy, or managerial techniques of his employer, he can adapt himself to whatever displeases him or he can seek another employer who meets his standards." In other words, "If you don't like it here, you're free to leave." I would rather believe that North-eastern is a place where one could sefely propose changes.

Let me contrast Marston's wholly unacceptable at tutude with nor that has eminated from the University Council, and which appears in part in the current Annual Report from the President of the University to the Board of Trustees: "The University supports as Indomannal to democratic president of the University and the University of the Wortheastern community to express their views and to protest actions or opinions with which they disagree, provided they do so in a peaceful and orderly manner.

"A university is a place where diverse ideas and viewpoints contend for acceptance in a continuing search for truth and in an atmosphere free of any recourse to physical force."

This statement from the University Council is a fine one, but I regret to say that it has not negated or superseded Marston's kind of approach. The General-Motor-factory attitude still prevails in the Department of English, along with the no-promotion, no-tenure squeeze that has also so long prevailed.

Earlier this year when I attempted to put into practice a 'right' circady 'guaranteed' within the department, namely, the right of free adoption of texts in Freshman English, I was told by the Director of Freshman English that this 'made things difficult for conditional exams.' I replied that I was, It assumed, competent enough to make up condi-tional exams, just as I would assume that I was competent enough to make up ordinary exams.

I added that I did not believe that any course at a university should be so geared and so conducted as to be ordered for the people who might fail it; but, rather, that it should be conducted for the people who could pass it.

Three days later (two of those days being a weekarea days lears (two or mass days being a week-end) I was summarily removed from the course— a course for which I had done extansive prepara-tion, and which I had avery right and avery reason to beliave that I would be teaching for the remain-der of the year.

Someday, when the credibility gap narrows be-tween what is said, and what is done at Northeast-ern, we may have a university at which greatness is not confused with bigness, and at which stature is not confused with size.

Until then, Ralph Nader has about as much chance of being welcome at General Motors as anyone here who protests against the mediocrity of the English Department has of getting tenure. General Motors, at least, can recall its defective products. What can a university do to recall its defectively prepared

McCarthy thanks you for CHOICE 68 votes

Dear Editor:

I am writing to you in the hope that you will communicate my appreciation to the students on your campus for their CHOICE 68 votes.

Not only because my candidacy was favored in the balloting am I grateful. More significant than the success or the losses of individual candidates in CHOICE 68 is the participation by one million students on some 1200 campuses in the political process. Student opinions, debated and expressed democratically, will influence elections throughout our nation.

CHOICE 68 opinions on military action, bombing and the urban situation have been forwarded to me. I note that 55.4 percent of my student supporters favor a reduction of military action in Vietnam and 29.1 percent are for withdrawal. Among students for me, 51.2 percent would stop the bombing and 28.4 percent prefer temporary suspension. I can assure you I shall keep these views in mind as I try to develop intelligent responses to changing international relations.

The emphasis of students for McCarthy on education and job training in our urban reconciliation efforts is reassuring to me in a very personal way. Let us remain together and I am confident that our common cause can change the direction of our country.

With best wishes.

Sincerely yours, Eugene J. McCarthy

Bookstore Nets \$39,000 SDS Asks for Reasons

The Students for a Democratic Society have learned that the university bookstore cleared a \$39,000 in the fiscal year ending in June 2, 1967.

The figures were verified in the office of Attorney General where Northeastern must file a yearly report as a non-profit organization.

Vice-President of Finance Lincoln C Bateson said the profit, which does not include overhead such as rent, heat and maintainance, amounts to only two or three percent of the total \$1.4 million in sales.

GROSS PROFIT

The average college hookstore runs a gross profit of about five per cent, Prof

Bateson said.

Any profit, he added, is poured back into the general fund for better and en-larged services. As an example, he cited an expanded bookstore expected to open in the fall.

In the fall,

Bruce Spaulding (70LA), a leader of SDS, said he felt the excess should be used to give the students lower prices on

the books.

Bookstore Manager Walter H. Floyd countered that the prices follow the re-commendations of the publishers.

RETAIL PRICE

The recommended prices run about 20 per cent above the wholesale price.

"Any money generated through services."

here must go right back into operations, Prof. Bateson said.

Floyd said the bookstore loses money when some publishers refuse to accept books that have been canceled by pro-fessors who requested them.

Used texts, he added, are not bought

by the store in any great quantity-only about five per cent.

However, across Huntington Ave., the Book Exchange concentrates on used texts. An employee said the store buys as much as 80 per cent of the stock is used editions.

USED TEXTS

Floyd said he would be able to buy more used texts if the faculty ordered their choices about five months ahead.

"By the time we get the adoption list here, it's too late to buy the books in any great numbers from the used book dis-

tributors," he said. Floyd said at the University of Maine the faculty is required to submit its book list carly enough for order of used texts.

If a revised edition is published, the

faculty is still committed to the text they ordered originally.

Prof. Bateson said the aim of his office is to keep the university on a halanced budget while keeping the tuition rates as low as possible. (Continued on Page 2)

UCAR Raises \$1086 For Hungry Biafrans

The Food for Biafra booth has collected \$1086 in the two weeks it operated. The money will be sent primarily to an organization known as BROTHER, a confederation of Biafran relief agencies in the Boston area under the direction of Phil Whitten, a Harvard graduate student.

BROTHER is unique in that it cuts across political boundaries to deliver hope to the hopeless. Unlike the International Red Cross, which has aligned itself with the Nigerian government to provide aid only to those areas held by Nigeria, BROTHER promises to feed any starving person anywhere. For this reason it has been allowed to unload its supplies at Nigerian-held ports.

Helping staff the booth were students of Mr. U. H. Chinwah, an instructor from Biafra, including John Addy, Bob DiNezzi, and John Drago, (70ME). Along with Profs. Bob Zalesh and Fred Glock of the Mechanical Engineering Department, Elaine Flaberty, Beverly Perikli, and Alan Granatassie, (69LA) spent many hours at the

Instrumental in the fund drive were UCAR, the Newman Club, and the Interfaith Council. The Bud Weiser campaign for mayoralty was singled out for their generous cotribution.

The group's next effort is a mixer, that will be held Saturday night in the Ballroom. The mixer will feature the "Dark Ages" and the "Apple". All proceeds will benefit the Biafran relief effort.

The mixer will begin at 8 p.m.

Council to Conduct Fund for Library

The Student Council Tuesday voted to establish a committee which will conduct a student library fund on campus

According to Nancy Vogelson (71LA), chairman of the committee, members will meet with University President Asa S. Knowles early next week to discuss the president's own fund-raising plans. The Library Committee then will formulate plans for on-campus and possibly off-campus fund solicitation, Miss Vogelson said.

In other council business Tuesday President Larry Stanford (69ENG) stressed that Student Council meetings are always open to members of the student body who wish to observe or contribute to council business. Stanford also noted that all Student Council committees are open to non-council members who wish to work on them.

Jim McDonnell (70Ed) moved that the Student Council recommend to the Athletics Department that no student activities group on campus, with the exception of the NU band, be permitted to reserve bleacher sections at the Kent Street Field for football games.

Members noted, however, that no activity group may legally reserve a section of seats and deny outsiders the right to sit with

McDonnell also announced that the Class of 1970 has formed an Alumni Pledge Fund. He said the purpose of the fund will be to solicit pledges from members of the Class of 1970 shortly before graduation, and will be donated in accordance with wishes expressed by class members through a questionnaire.

Michael Vance (71Ph), co-chairman of the Council Elections Committee, announced that the Class of 1972 will hold an election for nine Student Council and five Class Board positions on Oct. 17. Nominations opened on Wednesday and will continue through Oct. 8

Vance said that 420 students, or approximately 30 percent of the Class of 1970, voted in that class' Student Council-Class Board election last Friday.

In a special council meeting on Monday night, Stanford explained Dr. Knowles' plans for his President's Advisory Committee, and Council members voted to have the student portion of the committee composed of one member of each of 16 campus activities.

Members felt that each group should select its own representative to the President's committee as opposed to having the president or chairman of each group represent it

The Library Story

Construction Begins in '70

Construction is expected to start on Northeastern University's 16-story library-learning resources center in the summer of 1970.

The library will be built in two phases, with the first phase costing \$6 million and with completion scheduled for the fall of 1972.

When the second phose is completed, the library will be able to house one million volumes.

After completion of the first phase, the center will contain 280 individual electronic study carrels scattered throughout the building, President Aso S. Knowles reported.

There will also be a seating capacity for 1,600 students, including 775 non-electric study booths and 120 small study-conference rooms

The \$6 million cost includes equipping the building with the latest electronic learning resources which will feed information using a variety of media from a central communications area on the first floor to the 280 electronic carrels.

The entire 16-story tower will be completed in the first phase, although six upper floors will not be finished on the interior until the second phase. The top floor will house the building's mechanical equipment.

President Knowles said the university has applied for a federal grant to help finance the building and an anonymous donor has already pledged a gift of \$1 million.

The library will be constructed around a central service core containing rest rooms, stairways, and elevators.

On the ground floor, in addition to the communications center,

Student Court Formed; Mechanics Not Defined

By MfKE DORFSMAN

A tentative plan for an all student court has been drawn by the Student Conneil's student rights committee and the Faculty-Senate.

The University Student Court (USC), according to the council's co-chainmen Frank Gerry (TIEd) and Dave Levinson (TIBA), would replace the Regulations and Discipluc Committee. They hope the count will begin by the end of this term.

R&D can only handle student disciplinary problems and is limited in scope, Gerry sand

An open formu is scheduled for October 31 in 356EC from 12 to 2 p.m. to get more opinions on the court.

Levinson said the USC could also handle cases which would parallel a civil case in court.

"It's patterned after the student court at Brandeis," Levinson said.

BRANDEIS PLAN

The Brandeis plan has a chief justice, a justice in counsel, an executive secretary, a corresponding secretary and five panelists or mrors.

Each position would be filled by a stu-

dent election, but the methods have not been completed.

Gerry said the Student Rights Committee and the Faculty Senate individually investigated the Brandeis court plan during the

"The purpose of the court," Levinson said, "is to enforce regulations passed by student and administrative authorities, and to protect individual students from baving their rights violated as a member of the university community."

Grievances between students and student groups will be settled in the court, Gerry said

He said if the conneil ruled that for some reason a student could not run for an election, the student could take the case to the court for a decision.

COURT'S APPEAL.

The court's only appeal is to President Asa S. Knowles under the present system.

The court will be conducted in the accepted United States style with cross examinations, the right to take the Fifth Amendment, and the right of each defendent or complainant to plead the case or

will be the library's processing area. The main entrance will be on the first floor, which will house a lobby, exhibit area, circulation desk, catalogs, reference area and periodicals.

President Knowles said the existing Dodge Library will continue to be used as a library when the new center is completed.

"The Bookworm in our Library May Die of Hunger . . . Please Give," was one of the many signs being carried around the Quad in order to publicize the Library Action Committees' book drive, which as of Wednesday raised \$1,300.

Approximately 20 freshmen gave up their lunch Tuesday to donate money to the book fund and march around the quad with their signs.

The action was spurred by Prof. Dan Allen, their English professor.

Prof. Allen kiddingly told them that they would all flunk English if they did not contribute to the fund.

The signs were made in class with the money donated by Prof. Allen. Among some of the slogans were: "Expand Your Mind With Books," or "A Dollar a Day to Keep Ignorance Away," and "Ignorance is Bliss But 'Tis Jolly To Be Wise," and "Our Bag is Books.

Please Give."

'WE'RE PLEASED'

Even with Prof. Allen's support, Nancy Vogelson (71 LA), the committee's chairman, said "We're pleased with the amount we have received so far, but we don't have nearly 100 percent support."

"A large percentage of the \$1,300 came from the students.

"A number of individual faculty members gave contributions, but we are disappointed in the number of faculty departments that have given us support, she said.

"Not a day goes by," Miss Vogelson continued, "that instructors do not criticize the library in one way or another."

'ENTHUSIASTIC APATHY'

Although they were all very enthusiastic before the drive started, not many have come up with contributions yet. If students are willing to back their complaints with money, the faculty should, too, she said.

About 1,000 contributions were made to bring the sum to Wednesday's figure.

This week the NEWS investigated the Council's claims of legitimacy. The facts proved impressive.

The number of students at the polls averages about 300 In at least three of the past four elections several candidates were unchalleng-ed and stepped into office.

According to the rules if no candidates run from a specific college, the seats from that college are filled at large.

According to the Student Council there are 28 mem-bers sitting on the Division Council. The existing ranks have been diminished by the fact that last year seven of nine council fresh-men entered Division A. Six members were added to the council after last week's 1970 elections and nine members of the sophomore class will become councilors after an election Oct. 17.

The Constitution provides for two representatives from each of the nine colleges for the freshman class plus one member at large. The other upperclasses are to be reprented by two students from the nine colleges plus two candidates at large.

LA to consider tenure question; Publish or perish' threat seen

By MARTIN BEISER AND NEDDA YOUNG

Three significant proposals concerning tenure and faculty promotions will be subnitted before next Wednesday's meeting of the Liberal Arts teaching staff, the NEWS earned late this week.

These proposals (see hox betiese proposals (see hox be-ow) are a direct response to a nemorandum consisting of an al-gedly new interpretation of uniersity tenure and promotion olicies by Dean of Faculty orthur E. Fitzgerald.

According to the memorandum, itzgerald held the following to e an "appropriate interpretae an "appropriate interpreta-ion" of the most recent Faculty Iandbook (1966-1967) for each

Faculty puts its head in the sand

A perverse kind of "faculty power," one which shuns its collective responsibility to the ideals of a university and its students, reared its head into apathy this term, and swallowed swiftly but wholely, the Experimental College, a welcome pursuit into creative and relevant

The program included a selection of courses of unique interest and, while all was not perfect, there was some promise of future suc-

These courses had no small effect on the student body, who showed great interest, flocking to the registration rolls. In many cases students were refused entrance because of limitations in class size.

The beauty of the college lay in its vision. At a time when students are beginning to question, to a small degree here, fervently at other places, the university's structural con-cept of education, the seeming irrelevance of today's courses to a basic identity searched for by the soul, the persistent journey into the great modern race, where crash-cramming, dehumanized technology, and blind competition engulf idealism and purpose. Social conscience and awareness is ignored. Students feel sucked into a vacuum of nothingness.

The Experimental College was self-expla-natory. It was looking into the future before the complete apathy by faculty members kill-ed its viability. If allowed to live, the college might have led to the roots of that very ele ment searched for by troubled radicals on campuses everywhere.

This is a time when faculty members are becoming increasingly aware of their importance in the struggle to liberate the university from administrators who use their power immorally, with no vision, no awareness, no commitment to moral principles. These administrators are accomplices to the perpetuation of this society's ills, the institutions of racism, big business, C.I.A.-ism, and imperialism, eco-nomic and political. They are impervious to

Radical students who are searching for vays to confront this existing situation, to change it, by redirecting the unversity's re-sources toward revolutionary restructuring, are in many cases looking to faculty members for support and even leadership.

How does Northeastern's faculty prepare itelf for eventualities? How do faculty members respond to helping, even remotely, to lead to better relations with students, who should be treated as allies in this important struggle if not right now, in the future? Even McGeorge Bundy, a liberal academician who has made some serious mistakes of advisement on Vietnam policies in the past, has some perceptive views on the "new faculty." He has published a study of "Faculty Power" (The Atlantic, Sept. 1968) in which he asserted, "It is the faculty which is the necessary center of gravity of the policies of the university for teaching, for fearning, for internal discipline, and for the educational quality and character of the institution as a . The small group of student radicals ... rightly regard the university administra-tion as the political center of their attack, and they rightly regard the general opinion of the faculty as the decisive judge of any action against that centre."

This concept contains the obvious notion of a growth and importance of faculty power and responsibility; for now but more important at this campus, for the future.

The faculty should be seizing this power; inducing the arrival of the movement away from university complicity and into resistance and confrontation.

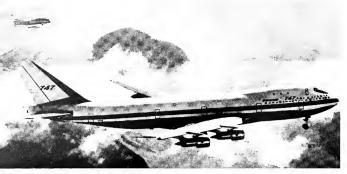

Bundy further states that, "Professore, unfortunately have used their new powers more for themselves as individuals than for their profession as a whole, let alone the insitutions in which thay live."

The professors at Northeastern, who are ignoring their responsibility, by ignoring pro-grams like the Experimental College, have ower character than Bundy's faculty members because they are not even aware of their new

Students protest tenure denial; Claim their needs subordinated

A petition protesting the denial of tenure to a psychology department faculty member, Dr. Ina Samuels, has been signed by more than 425 students in two days, the NEWS learned this week.

Plans were being made Wednesday to present the petitions sometime today to Dr. A. B. Warren, head of the Psychology Department.

The netition statement addressed to the department's fac-ulty, describes Dr. Samuels as "a gifted and inspiring instuctor who shows unusual interest in the problems of her undergraduate students," and goes on to criticize the department for failure to "recognize the importance of class-room-oriented faculty members."

Fall tuition rise set at \$75; 65 faculty hirings revealed

Northeastern's upperclassmen will start paying \$75 more per quarter for their education this fall, according to an announcement made by President Asa S. Knowles Thursday before a special faculty-student committee.

Freshman tuition rates have been increased by \$50 per academic quarter.

Indicating the factors which made the rise necessary Pres. Knowles listed the need to in-crease faculty and staff salaries and the requirement to add a substantial number of additional faculty members.

"Like all other universities," he stated, "Northeastern finds it-self faced with a rising apiral of costs with the expense of opera-

at an annual rate of 8.8 per cent. He added, however, that the increased tuition "toean't tell the whole story," because of the increased enrollments.

Prea. Knowles said that the increased cost of university operation for 1969-70 will be approximately \$250.000. Including the

tion for 1969-70 will be approxi-mately \$3,659,000. Including the rise of tuitions, the projected in-come for 1969-70 is \$2,972,000. Therefore, the university will be operating on a deficit budget, ac-

Students Fight During March **Protesting ROTC on Campus**

The first taste of violence in an emotional week of anti-ROTC activity came to the Northeastern campus Wednesday as undergraduate bystanders clashed with SDS picketers in the quadrangle.

Trouble hegan shortly before 10 a.m., some 90 minutes after SDS members and supporters hegan what was to have been a day-long informational picket line through the quadrangle.

According to Douglas Stone (71LA), a spokesman for SDS, "Our picket line was designed to last all day and was not meant to obstruct people from entering or leaving Richards Hall. We were marching peaceably around the quad when three students came into the middle and demanded, 'What's going on here?'

NO DIALOGUE

Stone said: "It was impossible to talk to them. They were not interested in talking. They were interested in breaking up the picket line.

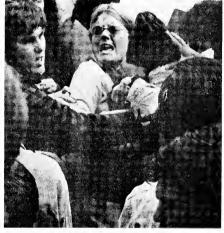

"Then they jumped Dave Smith," Stone said. "They hit him and knocked off his glasses. Others followed. They tore up signs and attacked just about everyone in the line. It's kind of sad," Stone noted, "that some NU students don't think. They resort to their fists instead of their brains. They can't discuss things rationally, and they have to resort to this."

DIFFERENT STORIES

Meanwhile groups of spectators gave varied accounts of the incident which left one student with a sizeable gash on his forehead.

But other non-SDS members said his injury occurred when a group of students asked to carry picket posters, then began to rip them up.

"All these guys from SDS started attacking the crowd," one student accused. "They're the ones who hurt that guy."

UNPEACEFUL PROTAGONIST — Raiph Morrison (738A), left, charges the SDS picket line in front of Richards Hail and begins tearing the poster carried by Lucy Ingersoli (73Ed.) During the moleo which quickly developed, witnesses said Morrison kicked some of the picketers.

Council Forms Group To Investigate ROTĈ

By NANCY VOGELSON

In an emotion-packed meeting Tuesday the Student Council voted to form a committee to make a full-scale of the Reserve Officers Training Corps, its curriculum and its eligibility to receive academic credit.

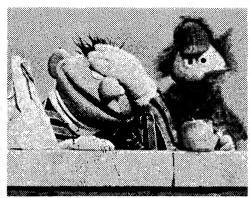

Members also defeated by a slim margin a motion to censure Councilor James Seldner (71LA) for his remarks March 28 to President Asa S.

In a meeting in Dr. Knowles' office Seldner accused the president of collaborating with the ROTC Department to subvert and undermine the Student Council.

The decision to form a ROTC study committee came in the after-math of the council's decision several weeks ago to remove academic credit from all military science courses. Councilors who voted in favor of the committee felt the body might not have studied the issue thoroughly enough and should therefore research the issue before drastic action is taken. Others believed the decision might have been in violation of Northeastern's contract with the Army.

Council, PAC Oppose ROTC Credit

Councilors Say It's Non-Academic

BY NANCY VOGELSON

The Student Council Tuesday voted to withiraw all academic credit from Reserve Officer Training Corps courses in one of the most reavily attended council meetings in university history.

More than 300 students, many of them members of Students for a Democratic Society, University Committee Against Racism, ROTC and other prominent campus groups, packed the Student Center Ballroom to debate the subject -- "Be it resolved that ROTC no longer be considered an academic course and that all credit be withdrawn" - with ppinionated council delegates.

The final vote, closer than many had anticipated with 25 for and 18 against the proposal, followed nearly two hours of formal addresses and informal, heated debate by students and faculty, opponents and proponents of the now-credited ROTC curriculum.

Six invited speakers, three for and three against the council proposal, addressed the tense audience for five minutes each, decrying the ROTC cause or appealing for abolition of credit for military courses.

FOR THE MILITARY - Lt. Col. Richard Bentley argued for retaining credit for ROTC at the Student Council meeting Tuesday. Frank Gerry (71Ed) held a microphone so the meeting could be be carried live on WNEU. The sketches for the NEWS were done

Dr. Knowles, former chairman of the National ROTC Council, added that he favored the Track C ROTC program, where the students didn't wear uniforms, took history, taught by university professors, and drilled on weekends or at summer camps.

Only two colleges, Business Adminis-tration and Education still allow grade credit for ROTC. The other colleges, he said, allowed add-on credit where the hours

were applied toward graduation.
"The credit given here," Dr. Knowles said, "is nearly token."

ROTC in some form should remain on campus, he said, because a lot of students want it.

"The students who want ROTC should have it," Dr. Knowles said. "Taking it away would deny their freedom."

He added that the \$21,000 the university annually pays to continue ROTC, is more than made up in the \$50 monthly scholarships the advanced cadets receive from the Army.

Black Students Get Afro-American Studies Center

An Afro-American Center and a Black Studies Department will be established here this spring, it was announced by President Asa S. Knowles last week.

Originally proposed to Knowles by an ad hoe Black Students Committee Feb. 14, the idea of the Center and Studies Department was later discussed by the president with university officials and the Agenda Committee of the Faculty Senate.

Dr. Knowles said he was "personally sympathetic" with the objectives of the Black Students Committee, and recommended to a committee of the Board of Trustees that facilities and funds be made available for the Centers.

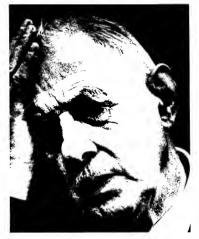

The Board of Trustees endorsed both the proposal for the Center and an additional proposal made by the ad hoc committee that a faculty - student - administration steering committee be formed to plan and govern the Center and the Black Studies Department.

It was decided by the administration that because funds are not available for the construction of new facilities for the Center, that space be found within the existing university structures.

Subsequently, the Forsyth Annex, which presently houses Alumni Records and University Publications, has been designated for this purpose. The present occupants will be relocated and the Afro-American Center should move in later this spring.

A PLEA FOR DISENGAGEMENT

The avowed purpose of a University is to provide a center for the development and free exchange of ideas in the pursuit of truth and knowledge. When a University becomes involved in ANY war, the fulfillment of this purpose is threatened. When, moreover, the war in question is as cruel and unjust as the Vietnam conflict, then University complicity not only perverts this purpose, but also jeopardizes the moral integrity of its faculty and students. We do not suggest that the University must take a stand AGAINST the war in Vietnam; we do believe that justice demands that it stop taking a stand FOR the war as it does by its current policies with respect to military training and job recruiting on campus. We therefore think it imperative that the University quickly and firmly disassociate itself from the war effort. To this end we strongly urge that Northeastern University take the following steps:

1) End all recruiting on campus by private companies and government agencies that are importantly involved in the war effort. (This would not infringe the rights of students. On-campus recruitment is clearly not a right, but rather a service of convenience offered by the University. In making decisions as to which services will be offered, the University constantly renders moral judgments. Through such judgments the University puts its stamp of moral approbation on all participating agencies. What we desire in the case of Dow Chemical Company and other such agencies is the withdrawal of this stamp of moral approbation.)

2) Begin now to plan the phasing out of the ROTC program.

(Even were there no war in Vietnam, clearly a University is not an appropriate place to train soldiers.)

3) Declare it University policy not to accept classified research contracts in any part of the University. (We recognize that no such contracts currently exist in the University, but feel that a positive statement of policy is desirable. The violation of the right of open and free discussion such contracts impose is selfevident.)

Senator Kennedy Weighs Resigning, Asks Public to Help in Decision

Tells of Lone Swim In Graphic TV Plea

By ROBERT B. KENNEY

HYANNIS PORT - Sen. Edward M. Kennedy went before the people of Massachusetts last right in an emotional TV appearance to tell them he was considering resigning his Senate seat, asking for their judgment but stating: "This is a decision 1 have finally to make on my own."

Referring to last Saturday's fatal accident on Martha's Vineyard which has seethed throughout the nation, the senator admitted that his eight-hour failure to report the accident was "indefensible."

He denied that he was driving under the influence of liquor and also denied the "widely circulated suspicions of the immoral conduct that have heen leveled at my behavior and hers," referring to Mary Jo Kopechne, the victim.

Callers React 2-1 in Favor Of Kennedy

The television speech of Sen. Edward M. Kennedy last night drew a 2-1 favorable reaction. Here are some of the comments:

Boston's Mayor White — "I know that Sen. Kennedy has served Massachusetts very well in the past and will continue to do so in the future."

Joan Donovan Burrill street, Swampscott—
"I think he should resign I think the man has just

SC votes moratorium support

Northeastern University joined the growing national student movement in support of the Vietnam Moratorium Tuesday when Student Council voted to request "the administration to cancel all normal activities ... October 15 ... to express its support of the goals of the moratorium."

The Faculty Senate was scheduled to vote on a similar resolution Thursday.

Local and national organizers of the moratorium are calling for a country-wide cessation of all "normal activity" on campuses and in communities on October 15 to demonstrate the demand for "immediate and total U. S. withdrawal from Vietnam."

By a vote of 25 to 9, the council, before an audience of approximately 180, resolved that, 'the Student Council at Northeastern, recognizing the value of educational experiences, and in order to express its support for the goals of the moratorium, requests the administration to cancel all normal activities pertaining to students, faculty, administrators and staff from 10 a.m. to 5 p.m. on October 15th."

The resolution considered at the senate meeting, which was originally presented September 25 by Prof. Arvin Grabel, states that, "the Faculty Senate, recognizing the value of unique educational experiences, requests the administration to cancel day classes from 10 a.m. to 5 p.m. on October 15 so that the Student Council may present its planned program.

Prof. Robert L. Cord proposed

at the earlier senate meeting that, "and in order to express its support for the goals of the moratorium," be added to the resolution.

When asked for comment Wednesday on the moratorium and the Sutdent Council's resolution, Pres. Asa S. Knowles replied, through his secretary, that he had "no comment."

Presenting the majority report at the council meeting, Stephen Potoff 72BA, chairman of the special studies committee, said he hoped the day would be "an organized educational experience with the backing of the admin-istration."

The resolution read, "That the Student Council at Northeastern University recognizing the value of educational experiences, and in order to express its support for the goals of the moratorium, requests the administration to (Continued on Page 6)

A resolution to cancel class-es October 15 in support of the Vietnam Moratorium was passed by a narrow 20-18 vote at the Faculty Senete meeting Thursday, after it was amended to extend the academic tarm one day to make up missed

A final decision on the cancellation must come from the president, who was out of town then the NEWS went to press.

The scheduled Faculty Sen-eta Development Committee's report on academic representation on university governing bodies (see story, page 7) will be presented at next week's meeting.

In cooperation with the Viet-nam Moratorium Committee, a nation-wide organization against the war, the council voted this week to support the commit-tee's efforts for arranging a national strike of college stu-dents as Octobes 14 in present dents on October 14 in protest of continued bloodshed

Hoping to exact pressure on President Nixon's Vietnam policy, the moratorium committee will extend the strike to two days in November, three days in December, and so on until there is a "firm committment to American withdrawal or a negotiated settlement." The Student Council, however, has not committed itself beyond the initial day of strike in October.

Furthermore, the Council voted to not entirely align itself with the moratorium committee since it knew little of the committee's make-up.

During the day of strike, there will be a series of discussions and teach-ins on campus to promote further think-ing on the war. Council hopes that all faculty members will not only support the strike by cancelling classes but also by joining in the discussions.

Knowles cancels Wed. classes: no stand taken on moratorium

By KATHY KEPNER

Following his announcement Tuesday that day classes on October 15 will be cancelled so that Student Council can proceed with their scheduled events for the nation-wide Vietnam Moratorium, President Asa S. Knowles told the NEWS Wednesday that his decision was not in support of the moratorium.

In the memorandum Knowles
released to the Northeastern
University Community on Tuesday, he said, "One compelling
reason for this cancellation
of classes in the physical interposebility of providing facilities
for both the regular schedule
of the University and the
program planned by the Stude
Council and endorsed by the facthly Senate."

However, the university offices and services will be expected to continue normal operation on that day and "workers will be that day and "workers will be expected to report as usual," the president said. The moratorium call for the cancellation of all "normal activity."

Referring to the dissent by faculty and students over the proposel resolutions passed by the Paculty Senate and Student Council supporting the moratorium, the president stated that it was not for the university to take a stand in view of the fact "many

Move to close vandalized Ell fails

By STEVE KAUFMAN

A motion introduced at the October 29 meeting of the Student Center Committee to close the Ell Student Center for one week because of widespread student vandalism and slovenliness was narrowly defeated by committee members.

According to David Hauger, 70- all five classes of the university, EE, the Class of 1970 representative to the committee, the meeting was called to discuss the disorderly condition of the lounge and to remedy the situation. The committee decided not to shut down the lounge because members felt it would be unfair to close the student-owned building. Night students would also have a legitimate complaint because the lounge would be closed through no fault of their own.

The committee is responsible for all decisions concerning the hudget of the building except for appropriation of large amounts of money. It is represented by and such organizations as the Student Council, the Inter-Fraternity Council, the Panbellenic Society, Husky Key, and WNEU.
According to Hauger, the Class

of 1962 decided that students needed a new student center. Facilities now present were lack-ing. Opened in the fall of 1965 with a 30-year mortgage, the building had originally not been intended for completion prior to 1970. The Board of Trustees approved its construction, however, following a petition signed by over 70 per cent of the students requesting that an addition be made to the student center build-

ing. Students, working as members of the student-faculty committee, planned and designed the building and its furnishings, which cost \$3,700,000.

Action Coalition marches despite court injunction

It was a rainy Tuesday morning as 25 members of the Northeastern community began their march to the Massachusetts Institute of Technology to join with fellow sympathizers for the first stage of the November Action Coalition's attempt to close down the school's on-campus war-related re-

NAC's specific targets were the Center for International Studies, which an NAC spokesmen said was "involved in espionage work for the government" and the Instrumentation Laboratories, con-nected with "defense rasperch."

On Monday, MIT President Howard Johnson announced he bad been successful in securing court injunction prohibiting the NAC as a group from "employ-ing force or violence, or the threat of force or violence, against persons or property on MIT premises."

Johnson was also able to re-ceive the faculty's approval in calling in outside aid for the two to four day attack.

SPECIAL MEETING.—Student Council Vice President Frenk Gerry (71Ed) (right) righes a gent at Tuesday's meeting at which members expressed desire to be included be university negotiations concerning possible campus violence.

Council Rescinds Recruitment Vote approved, disassociates the use of the executive board of the student Thursday morning with the Executive Board of the student

The Student Council in a special session voted to prohibit the General Electric Company from recruiting on campus at this time, a vote rescinding council's action eight days previous.

The meeting, held in the ballroom Wednesday night, was called as a result of developments which occurred this week, namely, the issuance of a restraining order by the university without the consultation of the Student Council.

Seven separate motions were passed, four by large majorities and the other three unanimously. The major motion, passed 18 to 10, demanded that the GE recruiter be restricted from the campus next week because the methods of controlling violence were determined by the university without student consultation.

A motion condemning the forceful removal of nonviolent GE union strikers from the campus, which occurred earlier this week, was passed unanimously in light of provisions in the Student Bill of Rights.

A second resolution unanimously approved, called for consultation with council in respect to any action concerning the use of Boston or other non-campus police or hired Boston police provided there is time for such consultation.

A third resolution unanimously

approved, disassociates the use of the executive board of the student council and the student council's name on the President Asa S. Knowles Wednesday's message. Council members felt the reference to them in the president's remarks were totally invalid.

Council considered the restraining order and any subsequent injunction to be invalid and non-applicable to Northeastern students on this campus.

They further charged Knowles and his administrative assistants with violating a resolution and precedent set in May of 1969 providing for joint consultation with the Agenda Committee of the faculty senate and the executive board of the student council and the president of the University.

The council also specifically demanded that the administration not serve the injunction or restraining order.

The final motion passed cited "flagrant and persistent violations of the University Student Bill of Rights." It also called for disassociation with the administration's present policy toward injunctions and restraining orders.

Finally, council called upon the faculty and student body to join in a condemnation of the administration's irresponsible use of power if the stated demands are not met.

Preparing for the demonstration against General Electric recruiting, the university administration will go to court Monday seeking an injunction against violent protest.

But the Student Council, after a joint emergency meeting Wednesday night voted to stop the injunction. The meeting was disturbed when three Boston Police appeared outside the meeting.

Yesterday afternoon, Council President Robert Weisman, Vice-President Frank Gerry and Secretary Mike Putnam met with the university's executive committee.

Weisman presented Dr. Asa S. Knowles with a statement explaining why the council believes the injunction should be stopped and condemns Dr. Knowles for not consulting the council as the elected student tepresentatives.

The statement concludes, "This action (the injunction) has placed the university in a position in which the likelihood of violent

(70LA) said, "The basic concept of

confrontation may well now be inevitable."

The council members believed possible alternatives were closed by not consulting the students. Additionally, the administration's action violated an agreement with the Council which said council's advice would be sought if prior knowledge of a demonstration were available.

The injunction prohibits John J. Fahey, Bruce W. Hershfield, Fredda E. Wieder, Phyllis Broker, Nancy E. Patten, Mark S. Alabaster and all persons acting with or in participation with aforesaid defendants," from entering, congregating, occupying, assuming control and trespassing on parts of the university when forbidden by an addinistrator to do so.

The administration has already retained Boston Police to work under the jurisdiction of Northeastern, but if the situation warrants it, police, working under their own leaders will be called.

The defendants named, Dean MacDonald said, were chosen because they are members of Students for a Democratic Society and the University Committee Against Racism. There was no known effort to name conservative group members who might counterdemonstrate.

The Student Council, concerned about the possible violence, temporarily rescinded its support of GE recruitment at the special meeting.

Knowles Backs Injunction With Fac-Sen Resolution

NORTHEASTERN UNIVERSITY Office of the President January 21, 1970

To: Members of the Northeastern Community

In a recent memorandum I reported to the University Community that certain young people, some of them identifiable as Northeastern students, indicated their opposition to recruitment by the General Electric Company scheduled for later this month.

It now appears from recent news articles and handbills posted about the University that a threefold attack against University activities has been planned for January 27-29. As indicated in the last issue of the Northeastern News, a group calling themselves the Northeastern Conspiracy is planning an action program, as follows:

- January 27, 28—Against General Electric Recruiting
- 2. January 29—Against the College of

Criminal Justice and the Law Enforcement Program at University College

 January 29—Against Dr. Hayakawa, a scheduled speaker in the Distinguished Speakers Series

A call to action printed in The Old Mole, a radical student newspaper, and the appearance of professionally prepared handbills make clear that radical students from the Greater Boston Community are being called to a "joint conspiracy" against activities scheduled at Northeastern.

Last week when we realized the full scope of the proposed radical attack on the University and its legitimate programs, we scheduled a number of consultations with administrative officers of the University and the University's Legal Counsel. On Monday, January 19 a joint meeting of the Faculty Senate Agenda Committee and the Executive

About 200 students, strikers and sympathizers protested General Electric recruitment Tuesday morning by picketing outside the United Realty Building, where the recruitment office is located.

The United Strike Support Committee, sponsor of the demonstration, gathered in the quad about 9:30 a.m. for last minute instructions. Shouting left wing slogans, the group marched from the quad, along Huntington Avenue, and down Forsyth

Upon reaching the building, one protester asked the policemen in the Forsyth Street doorway if he could go in to see the G.E. recruiter. He was denied entrance because he didn't have an appointment.

While a "Building Condemned" poster was placed next to the doorway, Burt Weiss of Cienfuego SDS told the demonstrators to form an unobstructional picket line as planned.

At 10:20, 14 representatives from United Electrical, Local 205, joined the picket line amid cheers from the protestors. Field organizer Doug Perry and financial secretary and treasurer Charlie Lowell were among the 14. Local 205 is striking the G.E. plant in Ashland.

Asked why the U.E. accepts the support of SDS and other radical groups, Lowell answered, "The U.E. has been Red-baited for so many years that a little more will never hurt us.

Around 10:30, eight policemen came up Forsyth Street from the direction of Ruggles Street and moved the pickets and spectators onto opposite sidewalks so that traffic could pass through.

CONFRONTATION-Students and police exchange words on the quadrangle after S.I. Hayakawa's speech Thursday night. Other confrontations during the night were less verbal and more physical.

Strike Receives Little Support

A feeling of apathy prevailed on the quad yesterday at noon at the suggestion of a student strike. Leaders of the rally representing various political opinions spoke out again on what happened here Thursday night and what the student body should do about it. About 200 attended the

rally.

They issued a plea that no one cooperate with the District Attorney in their investigation of Thursday's activities.

Some of the issues brought up were abolition of ROTC and the college of Criminal Justice, racism, the co-op system, and student administration problems. Finally, a day of protest, possibly for today, was generally agreed upon by a few of the leaders, but was not wholeheartedly accepted by the crowd.

The day of protest would not necessarily mean a boycott of classes, but a discussion of what occurred

Thursday on campus. The purpose of the rally, they said, was to bring out the truth and to educate the student

Earlier, Dr. Asa S. Knowles issued a statement from his office detailing the events last week

The statement said aggrieved students could receive legal aid from attorney Philip Boyd, in 139 Richards. Dr. Knowles' statement said a faculty member reported that the Weathermen planned to visit Northeastern Thursday armed with rocks. Dr. Knowles said students close to SDS confirmed the plans and added that the Weathermen planned to beat up Northeastern SDS members unless they became more militant.

About excessive police action, Dr. Knowles said: "Police called to the scene from other sections of the city may have had difficulty distinguishing between innocent students and those bent on destruction. Only a careful investigation will reveal all the facts of what happened in the streets adjacent to the university."

He was asked for the names of those facing charges from the demonstration, the names of the injured, both police and civilians, and the police department's side of the

Suffolk County Dist. Atty. Garrett H. Byrne announced Saturday that his office will investigate the incident which resulted in the injuries of 28 policemen and an undetermined number of students.

"Police officers are not second class citizens," Byrne said this weekend. "If they are attacked in the performance of duty they have a right to defend themselves. I will use every means at my disposal to protect these officers in qualling these student

riots."
Two members of Byrne's office Jack I. Zalkind and Lawrence Cameron are handling the

investigation. Zalkind refused to discuss any matters of the case with the News referring to the canons of judicial ethics. "I don't want to say anything that might prejudice the case against

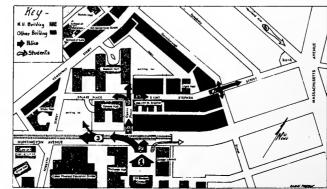

the defendants," he said.

He said he was unaware of press statements in Monday morning's

Globe. "I don't know where it came from," he said. He repeated his refusal to comment when asked about reports in Saturday's newspapers saying the district attorney was investigating why police were not issued helmets and who was responsible for throwing rocks.

Capt. John Kreckler, of the police superintendent's office, also refused to discuss the case with the News

Monday morning,
"We prefer not to discuss it in view of the fact that there is going to be court action."

PETER GOLDIN:

l was at the library last night studying for a test today. I watched the action briefly before I went into the library. Upon coming out I saw that the quadrangle was cleared except for a few people on the steps of the library. I walked across the quadrangle to the far exit of Richards Hall. The line of demonstrators had been pushed out onto Huntington Avenue. I saw what appeared to be an arrest and a photographer trying to take a picture of it. The photographer was hit by a cop standing behind the fence. The photographer then turned around and claimed that the action was unnecessary, an opinion with which I concur. I got the policeman's badge number which I believe was 201. Deciding to go back to the apartment, we proceeded to move through the police line using the car that the police had left a space around to get through. On the other side of the car I saw a policeman threaten a demonstrator swinging with cither fist or a blackjack and yelling, "Get out of here, you filthy animal." I spent the rest of the evening helping people who had been hurt and giving rides to the hospital. Peter Goldin

IAN DOUG JOHNSON:

I was an usher at the speech. I saw the cops push a guy through the window of the Frost Lounge. They were using the lounge to keep them until the paddy wagon got there. I don't have the slightest idea what they arrested him for because I was inside, but the second or third guy they brought in was pushed through the door that was not open and the glass broke and he wasn't struggling or anything. He was completely passive. struggling or anything. He was completely passive. At that point there were some people there taking puctures and they told the guys they had to leave and couldn't take pictures. There was a guy standing beside me and he said to the cop who was also standing beside me, "Why won't you allow pictures?" The cop turned around and said something like, "Shut up or I'll punch you in the nose," and then the kid started to say something else and the cop yelled "Shut up" again and some of his friends dragged him away so that nothing would happen to him. The reason I'm telling you this is because I definitely saw them mush the kid this is because I definitely saw them push the kid through the door, but I heard out in the quad that someone testified it was the cop whose shoulder hit the door and broke the glass, but it wasn't. DANIEL RAFFERTY:

I was one of four witnesses present in the Frost Lounge, when the police brought in the five people that were first arrested. The first person brought in was accused of throwing rocks. He had six policemen drag him in, assaulted him by kicking him and punching him. The detective was beating him over the head with a blackjack as he beating him over the head with a blackJack as ne was being handcuffed. He was being kicked and beaten as they put the cuffs on him. About this time they brought in the second person without manhandling him too much. He was a photographer and they told him to sit down and confissated his film. He remained in the room as they brought in two more people. The third person was brought in by five cops and was pushed through the window, breaking glass. He kept asking who was going to arrest these characters (plainclothesmen). He was accused of spitting at a police officer. He kept denying it and they kept beating him. He tried to break away. And they beat him down with sticks and black jacks. He tried to get away a second time and a police man jumped on his legs, and a plainclothesman jumped on his ankle and I heard bones cracking. They finally put cuffs on him and kept beating him. About this time the fourth

I was standing in the lobby and they had policemen on the doors and all I could hear was kicking and screaming, sounds of people being beaten. I only saw one kid being taken to the paddy wagon. He was limping and his head was bleeding and he looked as if he had been badly beaten.

JAMES L. PROST:

l was a typical apathetic Northeastern student. I'm a senior political science major, who generally just goes to classes, gets good marks and goes home

On Thursday night, my roommate and I (my roommate is a Lt. Col. in ROTC) went to se S.I. Hayakawa speak. Although I did not agree with Hayakawa's statement's I was very much annoyed and angered with the actions of the radical groups against Hayakawa. I had no knowledge of events going on outside while I was listening to Hayakawa. After Hayakawa completed his speech, my roommate and I left the auditorium.

My roommate and I and several other students for a few minutes in the quadrangle to discuss Hayakawa's speech. Boston police officers informed us to clear the quadrangle. We cleared the quadrangle.

While I was crossing Huntington Ave., I saw a police officer mercilessly beat a student. In my horror I cried "Jesus Christ-Stop!" Where upon a police officer stopped beating the student and punched me in the eye with his fist. I screamed for his badge number and the next thing I knew, he had me around the neck with his arm and he yelled, "Rock-thrower." He started to drag me off to the police wagon as my roommate and Dr. Cord. who had witnessed the event, pleaded with the officers to stop.

l was then thrown into the paddy-wagon, I was then thrown into the paddy-wagon. Soon other students were thrown into the paddy-wagon. The paddy-wagon contained six people. Four of them were Northeastern University students. One was a co-op student from Antioch College and one was a staff photographer from the Boston Globe, Mr. Ellis. Four of the people arrested were maced, including the Boston Globe photographer. One of the students suffered a knee injury and 1 suffered a severe black eye which was throbbing violently.

One of the students claimed his eyes were burning violently from the mace. His eyes were edd and watery. He asked for medical attention and did not receive it until after he was in the police station for 15 minutes.

At police station we were not informed of our rights with the exception of the right to make a phone call. The police officers were generally polite although they derided all of us for having radical political views. The ethnic background of each person was made a point of. The Boston Globe photographer received special privileges. I do not know if he was released but he was not locked up with the five students.

After being hooked (I guess) they took all my valuables and I was locked up until I was bailed out at about 2:30 a.m. I was to be arraigned at 9

a.m. in Roxbury court.

The police officer in charge of the station said I did not need medical attention for my eye. After being released on bail I went to Massachusetts Eye and Ear for an eye examination. There was a slight irritation of the cornea, but there was no major eye damage. The doctor applied a local anesthetic and an antibiotic to my eye. I have an appointment to go Saturday morning for x-rays and a thorough eye examination.

On Friday morning I was arraigned in Roxbury District Court. The officer who had attacked and arrested me was nowhere to he seen. An officer who I had never seen before accused me of throwing a rock and came complete with the evidence in a paper bag.

JOHN GOFF:

Last night after the assembly I walked outside and was forced off the grounds of the university. I went down Huntington Avenue till I was next to the Cabot Gymnasium, circled around and went through the Student Center, and again emerged at the auditorium. I walked outside . . . was with my friend Loren. We were both carrying cameras, and took pictures of the police. As we were taking the pictures and talking to two policemen on the corner, we witnessed one policeman hit a girl in the ear and mouth. They then asked us to leave the scene explicitly ("Get the Christ out of here.") We then went across the street from the quad and we split up. I was chased up Opera Place and was forced to go into Stetson West to get away from the cops. On the steps of Stetson West there was one kid bleeding from the head and they took him away without aiding him. They made numerous charges up and down Speare Place and each time the slowest people or the last in line were hit repeatedly and some were taken away and some escaped. I witnessed one person in front of White Hall who couldn't get through the gates; he was arrested and taken away.

MALCOLM EMORY:

I came out of the library with books under my arm when I saw all the people there. I put down my books and I walked around and talked to friends. Some people were throwing rocks or some bricks at the police who then charged the crowd. Everybody scattered and then police got one of two people down on the ground and were beating them with clubs.

GERALD GOLDEN:

Many articles will have been submitted by the time this one arrives, but I feel that what I have to say could bear more light on the events which took place.

I am not a member of SDS and have had no affiliation with them. In fact, I was, when a freshmen, a member of the College of Criminal Justice, and at the present time I am taking a night course in Criminal Law,

Policemen are human beings. They are people with likes and dislikes, needs and assets. I personally know policemen, have become good friends of policemen. Thus, I am not frightened or hostile at the sight of a cop. This is important because my statement takes a view corresponding to the above; not in defense of the actions but in complete and furious dissapproval!

Events began for myself at about 7:45 p.m. Myself and two roommates had returned from MacDonald's to the quad a second time that night. The stairs of the Ell Center by this time were filled with people. By the doors of the building could be seen, policemen, approximately eight or nine could be seen. The quad itself had not filled the tarred region yet. People were beginning to gather on the steps of the Dodge and Richard buildings.

I also met a former neighbor of mine, now residing in Topsfield named Robert Campbell, an adult of about 40 who was at the campus to hear Hayakawa speak. Both of us agreed the atmosphere was one of a picnic. People laughing, mostly speculating on any events that could happen.

A group of about six boys,

whom we had seen at MacDonald's, began singing behind us, carrying a black flag. The chanting didn't catch on with the rest of the crowd. They drew up behind us within six yards and

Our attention was called to a loudspeaker to he right, towards Richards. The spokesman was the one who led Tuesday's demonstration. He claimed that people with tickets could not get in unless they had an identification card of N.U. Nothing much was made of it.

"Students were lyi the gutter

About five minutes later he pulled up to our left, Dodge side, and gave the same speech: I.D.'s and tickets required. Again, the crowd made little if no response.

Several NLF banners had been brought on and raised at this time. Again, the speaker got to the Ell stairs about halfway up began to speak again. He began to read a pamphlet about a San Described by the speak of the speak again.

Time: 8:45 p.m. Mr.

Campbell was able to get a ticket, so I lent him my night school I.D. He looked at his watch, saw it to the above mentioned time, lofted me a farewell, and made his way up the crowded stairway to the front door, and got in.

Just as he got through the door, a black student wearing a beret on the top step yelled that pigs were surrounding the place. What appeared to be a captain led a group through the crowd from the Richard's side, and went up that side of the stairs. About three-fourths of the way up, a policeman nearly knocked down a student. The student responded in a verbal manner, the cop's hat was knocked off. At this point, kids hegan to run away from the building. I turned to find my roommates, found them gone, turned back to see kids being pushed and hurled from the stairs by police. Girls were run down by the mob and tramped on. I held my ground about 20 feet from the base of the stairs. Boston police stopped at the bottom step, and filled in the next three.shoulder to shoulder. Only a sparse crowd remained in the quad.

JOHN MISIEWICZ:

There were two things I saw. Two students ... young people ... were throwing snowballs into the crowd and at the police. As soon as the melee started they took off. It was a lark to them. I was in the library on the first floor in the reference room.

Secondly, I saw a policeman being beat up. When one of them fell, a group of rioters or whatever jumped on him and started to beat on him. He went down and then some of the other policemen came to his aid. When they came to his aid the students came on them and tried to and took him off into the Frost Lounge.

dragging kids to the ground and were employing the use of Yawara sticks (hand size "billy"clubs) on people at will. If anyone was too slow, their reward was a crack on the head. The police from the stairs began to move out, in a charge across the quad.

The SDS member who wore specs, beards, standing about 5'4", was hurled to the ground and pounced upon by 5 cops, dragged across the hot top and brought up into the Ell center

lobby.

I was grabbed by two
policemen and was being escorted out of the quad, when we walked by a boy sitting on a bench near a tree. The cop said move; the kid responded with "Fuck you!" The two dropped me, grabbed him and beat him over the head viciously. I tried to help, but was pushed back. They finally left him. I helped him out, his head bleeding. We were the last to leave the quad.

We brushed by the big evergreen tree and jumped the fence. The kid walked off looking for first aid. The police gathered at both gates. People were left on the Dodge stairs and Richards stairs. A kid who was studying in the library walked out, books in hand, and was attacked by police.

A very short time later they began to clear the sidewalk, pushing people into the streets. A student who was dressed as a first aid person in a white coat was "shaken down" in the middle of

PHILIP BOLDUE:

Subsequent to the clearing of the quad on Thursday night, close to 10:00 the police began sporadically attacking non-violent observers in groups of 30 or more; confusion ensued, the observers scattered, the slower of them being captured and beaten by the police. This took place on Huntington, Speare Place and Opera Place.

BARBARA SMITH:

I was present in the Quad last night standing immediately in front of the line of policemen in front of the Ell Center. Students began to throw rocks at the building and at the police. An officer directed three policemen to move on a student with a rock in his hand; they threw the students to the ground and then began to advance, ordering the ground and then began to advance, ordering people to move out. An officer directly on my left smashed the camera of a hoy who was merely standing there. This was the only instance of unnecessary violence I observed while the officers were clearing people from the quad. However, after the Quad was cleared and the police proceeded out onto Huntington Avenue police discipline broke down. The police began to push and shove neonle who were merely standing on the and shove people who were merely standing on the street, walking down the street, people who weren't doing anything to arouse the anger of the police or to incite the use of force or violence

FREDERICK G. HUNT:

Having gone to the Thursday night demonstrations as a political observer, I tried to present as many forms of violence as possible.

Admitting that the initial violence was from a faction of the youth in the quad. I find it necessary to point out that most of the violence that I witnessed was the action of policemen, 20 to 30 at a time rushing the crowds of students on to 30 at a time rusning the crowds of students on Huntington Avenue at the trolley stop, at the dorm areas of \$t. Stephens Street, Speare Place and Forsyth Street. I stayed very close to the violence, heing just beyond (5-10 yards) those apprehended by the police. The tactics involved consisted of a rush of 20 to 30 officers at a time into mass crowds indiscriminately seizing upon those closest to hand. The worst area of unprovoked police action was in the area of the intersection of St. Stephens and Speare Place where at least 30 officers at a time apprehended men and women alike in the streets, the alley, on the lawn, on the steps of the dorm and inside the dorms without restraint from violence. I therefore had close access and witnessed the apprehension of at least ten youths, men and women, by the violence of 5 officers at a time.

BARBARA FERRI, RICHARD WHITE:

Last night we snuck in through the hasement to the lobby of the BIL Center in front of the auditorium. Its goal seeking facts about what happened on Jan. 29 is symbolized by members wearing white armbands. The group's actions, so far, include recording statements and backing the

Another goal of the group is to get legal and medical aid for those arrested and/or injured in the vio-lence. Meryl Brown (70ED), another member, said that the group is an outgrowth of Friday's open meeting in the quad and Alumni Auditorium.

An important factor with the Truth ement is that it is not com with the four demands that were presented to Pres, Knowles after Fri-

In recent weeks, printed and oral threats against General Electric recrinters on the Northeastern University campus and against the appearance of Dr S.I. Havakawa, President of San Francisco State College, have been very prevalent With these threats, Northeastern naturally took steps to protect the rights and guarantee the safety of these individuals The steps that the University took were the augmentation of our Campus Security Force and the procurement of a restraining order from the Suffolk Superior Court

19 Acquitted

Cases were dismissed yesterday against 19 of the 31 arrested in connection with the Hayakawa riots at NU on Jan. 29. Beth Doyle, one of the defendants, said that lawyers representing the 19 conferred with the judge and that Mr. Holmans, a university lawyer, announced they would be free and there would be no criminal records involved provided they stayed out of trouble for the next six months.

The charges against all 19 defendants were either "being a disorderly person" and/or "blocking a free footpath," both misdemeanors. Those charged with felonies are to go on trial today and those to be prosecuted under a grand jury indictment will be tried at a later date.

Miss Doyle also said that Dean Gilbert MacDonald had hinted that the charges might be dropped in a meeting held earlier this week.

Knowles Outlines Campus Unres

By SCOOP LEAHY

President Asa S. Knowles listed the results of campus unrest in the '60's yesterday in a speech at the 27th Biennial Convocation of Kappa Delta Pi.

Speaking at a luncheon at the Statler-Hilton Hotel, Dr. Knowles cited many changes in the university, such as the growth of student and faculty power, decline of prestige for higher education and a loss of power by college presidents.

Noting that now "many students and faculty are on many more committees than before," he mentioned that at Northeastern he is going to meet soon with a committee of students, faculty, and administration to decide "how much we are probably going to raise tuition."

Dr. Knowles described the '60's as being "the best of times and the worst of times;" the best of times because of the growth of higher education by leaps and bounds and the worst of times because of the large number of demonstrations, disruptions and shut-

downs

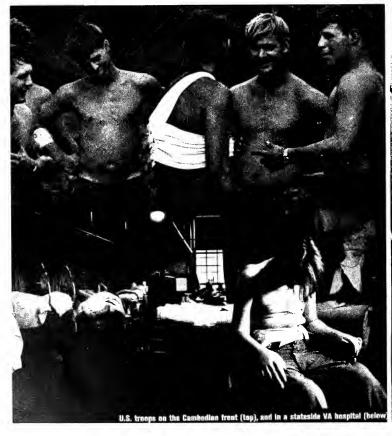

On the role of the college president, he said pre idents now must share much lost power with facult and students. He called this "government by co currence"

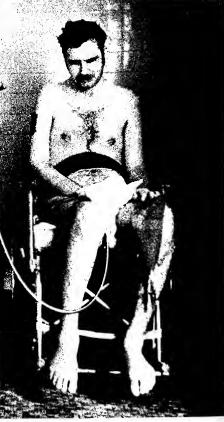

"Presidents deal with many pressure groups," I said, and they must try to satisfy all these group from students and faculty to state and federal go ernments.

In a press conference held after the speech, D Knowles said that he neither intends to resign a President of Northeastern nor to seek political offic

LA Faculty Approves UCAR Course

The faculty of the College of Liberal Arts Wednesday voted to grant academic credit to an experimental course in the Analvsis of American Racism.

The Racism course, begun on an experimental basis last summer, will receive credit beginning next term, and will be taught by undergraduate students who will receive Work-Study salaries whenever possible,
A report presented to the LA faculty by

an ad hoc committee appointed five months ago to study the course, states the commit-tee's wholehearted support of the studenttaught course. Members of the committee last term by Cindy Baltimore (70LA) and Pamela Wakefield (71LA), both members of the University Committee Against Racism.

In its report the committee stated, "(We) reel that the materials and class discussion were productive and interesting. The stu-lents were highly motivated and because of diverse opinions expressed in the discus-tions, they were moved to be more objecive in their evaluation of the information presented.

It continued, "Although more critical ap oraisal of controversial material could have occur done in the course, our committee manimously feels that the Liberal Arts Fac"by should give it the chance to prove it-self on a credit basis."

COURSE SUPERVISION

The course will be supervised by five faculty members and five students chosen by the LA Curriculum Committee and LA Student Advisory Committee. The report specifies that two of the students must be members of UCAR, which created the

A minority of the faculty attending the meeting questioned the concept of a studenttaught course. Prof. Norbert Fullington of the History Department suggested that a "qualified person," rather than a "qualified student" be commissioned to teach the

Prof. Joseph Wellbank of the Philosophy Department opposed UCAR's teaching the course, but on different grounds. In a sub-stitute motion presented to the LA faculty, Wellbank questioned whether students are qualified at all to teach a university course.

"... undergraduates are not competent to handle a course requiring the masterful use of materials drawn from these disciplines ... undergraduates are not competent to (psychology, sociology, education "and other relevant disciplines.")

It stated further that "... ing of the academic standards of the teaching profession to give academic credit for courses offered by persons who have not met minimum qualifications. . ."

UNQUALIFIED

"Granting academic credit for courses taught by unqualified personnel, and dooe so apart from the supervision normally exercised by an academic department conduct-ing such an 'experiment,' significantly and seriously lowers the academic standards of the College of Liberal Arts," Wellbank's motion continued.

Wellbank charged further that since UCAR was active in the Northeastern Con-spiracy, "whose publicized goal was the dis-ruption of the University," they were partially responsible for the injury and damage

Dr. Sally Michael of Philosophy was among those who criticized Wellbank's mo-tion. She contended that, "All the positions

Nader Challenges Nation's Youth

Issuing a challenge to the nation's young, consumer advocate Ralph Nader said that despite youth's idealism they must have more staying power if the fight for consumer protection is to be won.

"If the future of the country rests on the young," Nader said, "they must bring more .than a visceral commitment. This means they must sacrifice."

Nader, second speaker this term in the Distinguished Speaker Series, addressed 1.300 members of the Northeastern community in Alumni Auditorium.

Where Dr. S. I. Hayakawa, last month's speaker, was jeered and heckled. Nader received a standing ovation. His speech repeatedly noted the sacrifices necessary to continue his battle against the corporations who neglect their roles in protecting the consumer.

After urging students to give up their Cokes, which have no nutrative value, and cigarettes and to reallocate their purchasing power, he said, "That sounds mundane, doesn't it? But that's the way reform agencies start. They don't begin with Rockefeller Foundation grants, you know."

Laboring under a cold, Nader carried a handkerchief in his right hand as he spoke stooped over the lectern; his long, thinfingered hands made his only speaking ges-

"The real shame is that the first inquiry into automobile safety wasn't from the engineering schools. There was a chrome curtain surrounding the industry."

The highway system, he said, is the largest transportation system in the country so the engineers could not dismiss the subject on grounds that it was insignificant.

Nader then began to cite the many instances his book "Unsafe at any Speed" revealed, including the ramroding steering which, which until 1967, impaled many drivers because the steering column wasn't built to collapse.

"That means that the auto industry finally concedes that it is more prudent for the steering column to give than the driver's rib cage," Nader explained.

Another area where engineers. until recently, have failed to work for safety is on the highway itself where signs and lampposts

are rooted in concrete. "You probably thought it had to be rooted in concrete. It doesn't have to be. That's to protect the post from property damage if a car crashes into it," he

Now through Nader's investigations, break-away signs and posts are being installed.

But the loud groans came when Nader explained unhealthy meatpacking practices.

"Food adulteration has never been higher," he said. "There are 15 billion frankfurters consumed a year in this country. A third of each hot dog is fat, the rest is filler, miscellaneous debris and sub-standard meat."

Most consumers excuse it, he explained, because it tastes good, they believe the government will

protect them, and they feel all right. But, he added, they are wrong on all counts.

There is an epidemic of canamong chickens in the country, Nader said. Any bird found diseased would have been thrown out, but recently the poultry lobby convinced the Food and Drug Administration to permit them to throw out only the diseased portion of the bird.

"The poultry lobby came in and said, 'We agree that the tumors and lesions on a wing may cause an aesthetic problem, but don't condemn the whole bird, cut off the wings.' They grind the wings up and put it in the hot dog.'

These consumer frauds continue because of private interests, again aided by the colleges, Nader said. He charged Dr. Frederick J. Stare, a Harvard nutritionist, with being a blatant example.

Stare writes columns and appears before Congressional panels frequently to testify on food, as he did in supporting food additives. But, Nader said, Stare is a paid consultant to the same companies which manufacture

the additives. Additives like cyclamates and monosodium glutimate only recently were found to be harm-

The solution, Nader said, was a more informed citizenry combined with those who are willing to stop consuming the offending products.

"The strident issue is that the ICC, the FDA, the Agriculture Department are all breaking laws in a way that never creeps into speeches. The brave vice-president is turning the masses against the downtrodden. but he doesn't have the guts to put General Motors into his

For that, he received a burst of applause which forced him to stop momentarily.

"That's the way it will be until we get a restructuring of our citizenship. It has to stop staring glassily at Johnny Carson. The system is so corrupt, it can't even obey the laws it wrote for itself'

Indictments Sought Against Students

District Attorney Garrett H. Byrne Wednesday sought grand jury indictments against 10 young people arrested Jan. 29 in connection with S. I. Hayakawa's appearance on campus as part of the Distinguished Speaker Series.

Byrne sought criminal indictments against seven of the 10. He charged the seven with assault and battery against police officers, a felony. If convicted, they could be sentenced to state prison terms.

The names of those indicted were not available.

Trouble broke out early in the evening Jan. 29 as students gathered in the quadrangle before Hayakawa's scheduled lecture in Alumni Auditorium

When told that Northeastern identification cards as well as tickets would be required for admittance, several radical students urged ticketholders to refuse to show their ID cards.

Later, a brick was tossed at a policeman by one of the quadrangle lingerers,

"Vietnam bill" seeks test on war's constitutionality

By JIM KELLY

Prof. Steve Worth's "Vietnam bill," which has won approval in the Massachusetts House and Senate is expected to reach the Supreme Court if approved by Governor Sargent.

The NU political science professor, who co-authored the legislation, feels "cautiously optimistic" about its actioning success in the high court." If the bill does nothing but force a rethinking of the process by which the country is led in and out of wars, it will have accomplished a great deal," he said.

The bill seeks to force a Supreme Court ruling on whether the President has the power to send a Massachusetts serviceman to a foreign war in which Congress has issued no formal declaration. Under its provisions a Bay State conscriptee could bring suit against the federal government for sending him to Vietnam.

The proposed law also charges the Attorney General of the Commonwealth to take all steps he deems necessary to implement the act. This means that any Massachusetts citizen in such a situation could appeal to the Supreme Court through the office of the Attorney General.

The original draft, as submitted by Worth, defined a war as, "Any area in which casualties or deaths from military action have taken place within sixty days after the initial deployment of United States armed forces in such area." The legislators removed this definition from the final draft, leaving resolution of the question of what constitutes a war to the high court.

Other amendments include the "test case" amendment, which stipulates that the outcome of one case would apply to all others in a similar situation, and an Emergency Preamble, which provides that the proposal would become effective as soon as it is signed into law rather than waiting the customary nine days.

Worth's involvement with the measure began when he was approached by Rep. H. James Shea (D-Newton), a former student of his, and by Rev. John M. Wells of Lexington, originator of the idea. When originally conceived idea.

there did not seem to be much hope that it would be considered anything more than a quixotic gesture.

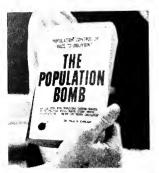

"People say thet when you take on something that's big," Worth commented, "it's like tilting at windmills. I suppose initially it was tilting at windmills but those of us who were involved with the bill thought this; 'there's nothing wrong with tilting at windmills if you're trying to get at the power behind It, the power behind that mill.' And I think," he continues, "thet we have gotten to that power."

The power which Worth is referring to is outlined in the United States Constitution. According to Article I, section 8, "The Congress shall have power ... to declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water."

Worth contends that Congress has thus far abrogated that re sponsibility, delegating its war declaring power to the President. "What our proposal does do," he stated "is to provide a means of redress for any Massachusetts citizen in the event his liberty is threatened through a process which excludes the Congress.

"The people have a right," he continued. "to this one essential opportunity to evaluate the course of the President's commitments in foreign affeirs, and to either affirm or deny these consequences which affect their liberty or their lives."

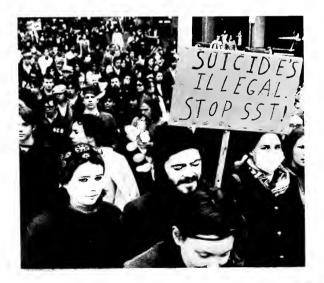

Similar legislation was recently introduced in New York and California, the two most populous (Continued on Page 6)

Street revolution — the bloody arm of the young resurrected from years of American history classes. Once it belonged to true patriots, now, reportedly, the possession of traitors, social deviants, and under privileged troublemakers.

Only in America can one announce a Harvard Square takeover, days in advance, and still be allowed to "Do it!"

From the Moratorium came an army of Naw Left factions — groups that made the Moratorium a day of factional speakers addressing each ene's faction. But from this came a mass to march through Cambridge and seize the kingdom of John Harvard, Lengfellow, Oliver Wendell Nolmes.

Four newsmen arrived at City Hall in Cambridge, 30 minutes before the legions. Fifty tactical policemen stood ready on the sidewalk before the structure, more were rationed out across the street.

They were armed with the usual equipment: steel helmets; the long, thin, heavy batons; heavy coats and badges that were soon to disappear.

The K-9 corps was also represented by a leasted German Shepard, amiable enough for picture-taking sessions.

Sunset to the west, a blue flashing light to the east, and a group of approximately 200 people, mostly black, marching from the south.

Was this all? a few cries of "Off the pig! Kill the pig!" Was this all?

The police standing shoulder to shoulder, sticks held horizontal as the group of youths — mostly too young for college — move by. The road leads to Harvard Square.

Was this all to march on Harvard Square? It was the first time during

It was the first time during the evening when the sense of uneasinese because of inactivity perpentrated the atmosphere.

Down Massachusetts Avenue came the armise of the evening. The police fingered their batons, the crowds advanced, the forrunners of the mass were passing City Hall throwing their barbs of "Off the pigs." All the pigs."

One marcher was dragged up the stairs, the lines were now passing—the taunts grew louder and a sound truck blared "don't stop," the main action isn't here and there is no reason to break

up the group over City Hall.
The bettailen moved faster, the

line was falling apart. The people in the rear were trying to carch up. Pear the rubble of old buildings if progressed. Rocks were picked up from the vacant lots—"Free Bobby Seale". One, two, three, four—We don't want your fucking wer."

People were breaking the ranks to find the perfect rock. Peace preservers were yelling to drop the stones—"What the fuck are you doing? No one's gonna get hurt if you don't start something. What the fuck are you doing?" People were breaking rank. The rocks were being picked up. The rearguard was trying to catch up.

The front ranks finally heeded the cries of the rear guard. At Purham Square the front halted, The marchers closed up. One could see the mass was not totally suddents. A blind man was being led by two girls, several people were on crutches, on emputes came by on crutches, on emputes came by on crutches. Older citizens were there, and other elder citizens limed the windows and stood at bus steps watching and murmuring and avoiding direct contact with the marchers.

The Old Cambridge Baptist Church was readied for use as a hospital. A young doctor yelled that if anyone was hurt, medics would be there. Red Cross banners on the structure, Bobble Seale banners in the atreet. Radicals called to the medics to forget the hospital and join the street people.

As the mass resumed motion.

As the mass resumed motion, the square opened up ahead. Out of the walls on the right, or the street on the right, or the ail around came the nasal "... And the times they are a-changing" of Bob Dylan's pre-Berkley song left over from days of nonviolent protest marches. The square opened up.

Police smash Hemenway, Westland

About 150 club-swinging Boston Tactical Police charged a crowd of 300 students on Hemenway street early Monday morning, smashing windows and beating bystanders, then surged into apartment buildings and dorms, smashing down doors and injuring residents. At least 20 persons, including a blind student were injured during the two and a half hour melee.

The charge came at 12:40 a.m. as the students lined Hemenway Street watching a group of 30 persons who sat in the roadway blocking traffic. Student marshals who had tried to disperse the crowd of onlookers said those in the street were not students. Police had notified Security Police prior to the charge and marshals had given 25 minutes warning to much of the crowd.

A report from WNEU newsman Ed Ferguson 74CE, at the scene said there was "no provocation whatsoever for the police attack," and reported at one point that police were on the roof of 99 Hemenway St. throwing rocks and bricks.

Reports from NEWS and WNEU newsmen at the scene said a police cruisar with two officers passed the area at 10:30 p.m. Sunday. As the car existed toward the Museum of Fine Arts, it stopped in front of 120 Hemenway St., where sameone threw a chair end beer can at the cruiser. Student marshals said the attacker was not a student.

Two hours later, a flaming mattress was thrown from the roof of the same building as students milled in the street. The building is not a dormitory.

Will any eyewitnesses to Sunday night's activities, as well as those who were injured and those who took photographs, please contact the NEWS in 446EC or call 437-26487 Thank you.

At midnight, the Northeastern Strike Information Center, which had been in direct communication with Mayor Kevin White's office for the previous two days, was notified that 100 police were massing near the intersection of Westland and Massachusetts Avenues. The report said that unless the area was cleared, the police would be called in.

The charge began forty minutes later from the intersection of Westland Avenue and Hemenway Street. Riot-helmeted police ran five abreast and 20 deep swinging clubs as students chanted, "1, 2, 3, 4, we don't want your fucking war." Police yelled "Up the pig, here come the pigs" in response.

After the first pass, the police regrouped at the same intersection and began a second charge. They smashed windows in homes and parked cers and beat bystanders as they passed, reporters said. People were clubbed while fleeing down streets and into buildings.

Police entered buildings in groups of up to 15 at a time, including apartment houses at 97, 99, 119, 120 and 153 Hemenway St., at Northeastern dorms at 115 and 157 Hemenway St., and 90 The Fenway. Apartments inside each of the buildings were smashed open and residents were clubbed. Furniture and personal belongings were smashed.

Northeastern's Asst. Director of Student Housing, David Robbins, was beaten by the police in the entryway of 153 Hemenway St. after he tried to call the students back into the dormitory.

Robbins' first-floor apartment door was kicked open. Robbins said his wife and children were inside at the time.

Robbins said he felt the police attack had been provoked, but that the tactical police "went a little too far.

"They're fast, they're brutal.
That's their job. They don't understand anything else," he said.

I stopped my car at the in-tersection of Forsyth and Hemenway streets and found three other cars stopped in the intersection with about seven to 10 people standing by them. I looked to the right (toward Gainsborough) and saw a group of perhana 20 40 tactical police standing in the street. I saw several looking down the street toward where I was sitting on the roof of my car, waving their nightsticks in my direction.

The next thing I saw (was) a group of eight to I5 tacticals come out of a building with a well-lighted front door, which enabled me to see the nightsticks in their hands.

They joined the group of tacticals in the street and they moved in my direction with no perceivable haste, I cannot say that I saw the street number of the building out of which the police came, but my conviction is that the police came out of 153 Hemenway St. This is based on the fact that the group of 20 to 40 police was standing directly next to a stretch of fence I know, and police came outside and walked straight to the middle of Hemenway Street

I swear the above statements are factual and truthful.

On the night in question I was standing in front of 153 Hemenway St. observing the disturbances of the evening. Seeing the students start to disperse and hearing rumors that the tactical force was coming I assumed the tectical force was clearing the streets. Many students, includ-ing myself, entered the dormi-tory. I immediately attempted to clear the lobby by telling the students to go to the upper floors of the building.

Moments later, a few members of the tectical force entered the building by smashing several plate class windows. Seeing them tering the building and swinging Indiscriminately at students and private property, I attempted k refuge in the closest door available, which was the apart-ment of David Robbins, assistant director of student housing at Northeastern. Finding the locked, I turned around and found the tactical force memb standing in front of me. in the process of identifying myself as ber of the staff, I was clubbed twice, resulting in need-ed medical attention. The offi-cers, having found that I was a mber of the staff, broke open the door of Mr. Robbins' apartment with a nightstick and or dered me inside. I also saw David Robbins get clubbed in a similar manner across the thighs.

In a conversation later in the evening with Lt. MacDonald of the tactical force, he informed me that no search warrants had been issued for any Northeastern University property. Later in the evening I received medical attention for an injury sustained in the incident.

At approximately 12:30 a.m., Monday, I ran into 153 Hemen-way St. I was standing in the lobby, when members of the Tactical Police Force converged on the building, breaking windows; I then ran into another apart

ment. The last person in the room was bleeding hard and

The police then retreated, and the people in the room left and stood in the lobby.

About 15 minutes later, four of us were standing in the doorway to an apartment and a fifth person was outside the room. Suddenly the person outside hollored to get in the room because the police were coming. The four ran into the interior and seconds later the fifth and an unknown sixth person entered the room.

The police kicked in the outer

door and entered the interior. There were three policemen and all five of us were hit. No arrests were made. As the last policeman was leaving, he stopped and with his club he swept off a bureau and then smashed a bottle. Other damage incurred was a broken set of shower doors and a smashed phone.

I was on the roof of 56 Symphony Rd. on Monday morning at 1 a.m. observing the Tactical Police Force clearing Symphony Road of people. A TPF spotted me, drew his gun and fired in my direction and then moved on.

I was working with the Red Cross (strike medics) aiding people on the street, when I was struck by a police officer on the head. They went crazy and beat erybody around. They beat a blind man up in front of his own apartment. They hroke windows. They threw bricks from the roof at kids. They repute their claim to be called animal. And now I ride on the revolution and want to get even for the sake of all those that were hurt in the struggle.

At about 12:30 a.m. I entered one of the apartments et 153 Hemenway St. One student was lying on the floor, bleeding pro-fusely from a gash on his right fore-arm. I helped him out of the room to administer first aid. After helping him out, I returned to the apartment with four others and we sat down in the middle

A couple of minutes later, I heard a lot of yelling, and two students ran in, one into the mid-dle room, the other into a third room, locking the door behind him. I heard a bang; later I learned they (the police) severed

After being struck twice, I yelled "What are you hitting us for, we haven't done anything?" and received no reply. As they left the room, I asked, "What the hell are you doing?" One of the policemen replied, "We're doing our job," and swept everything off of the top of a bureau smashing a couple of bottles. Then they

The main group of Tactical Police Force were still coming down Hemenway Street when I decided to return to Melvin Hall I was in the middle of the small alley, between 84 and 90 The Fenway, when one tactical pig came tearing around the corner. Having just gone outside a few minutes before (and thereby missing the previous police action) I threw my hands into the air and stood at attention.

This lone cop reached down and from a distance of eight to 10 feet threw half a brick at me. I ducked to the ground and it went just over my head. He began to swing his club at me when witnesses on my dorm's rear balconies began to holler. I guess he heard them past his own cursing just enough to imagine that someone was going to throw something at him from the fire

He had left the main group of ops so I guess he just wanted a little blood, yeah, real sport for the creep.

At approximately I:00 a.m., a group of nine or 10 policemen (fully riot-equipped) strolled up The Fenway and stopped in front of Melvin Hall. I was watching them from the lobby window.

On a signal from one of them they began throwing rocks through Melvin's windows, shouting obsceneties, I heard one of them say, "You lucking has-tards! You throw more rocks than us!" and another made a pointed remark about a student's mother (perhaps to commemorate Mother's Day).

Ed Ferguson Statement

At this time I wish to state that a quote of mine was used out of context on the first page of Northeastern NEWS, Tuesday, May 12. The NEWS quoted me as saying "no provocation whatsoever for the police attack." Unfortunately the time of this statement was not given. At approximately 1:51 a.m. the police had made a second charge down the street entering 97 and 103 Hemenway Street. It was at this time that the police were throwing rocks off the roof of this building. It was during this second attack, not during the first attack, that I made the statement" no provocation whatsoever for the police attack." I was not consulted before this quote was used and this is why it is out of context. There was definitely provocation for the first attack.

More accounts of Hemenway Street fracas

Second floor

On the morning of May 11th, 1970, around 12:45 I was sitting on my porch at 111 Gainsborough Street when I saw policemen running down Hemenway Street to disperse a crowd that had gathered on Hemenway Street for a block party. (the people, 5 or 6 out of the crowd, had been trying to incite the crowd by block ing traffic between Gainsborough Street and Westland — they were unsuccessful in inciting the crowd). I was not involved in any action that might have provoked the police

I saw the police group at the intersection of Hemenway and Gainsborough and I saw them break the door windows with their sticks at 110 Gainsborough Street and charge into the building.

I observed approximately policemen breaking into a run toward my bullding and I rushed into my apartment with 8 other people. Some stranger in this group ran through our apartment and out the livingroom window onto the fire escape. My roommate, Bob Donovan and I held the apartment door after the police started trying to break it down. They burst the door off its hinges and I ran into the kit-chen and was approached by a black policeman who proceeded to club me with his nightstick. After approximately 10 blows, I managed to grab his stick with one hand. Then another police-man came over and clubbed me. The black policeman said "let go of my stick," and after a few minutes they left.

We all went to the upstairs apartment and I collapsed on the couch in shock. At about 2 a.m. I was taken to the Peter Bent Brigham Hospital, treated, and released.

'Get one for you'

I am William C. DeSerres of 115 Gainsborough St. in Boston, am 22 years old and a student at Northeastern University. This is my fifth and last year of undergraduate study; during most of these years I have been a history major with better than average grades and have had co-operative education jobs working for the National Park Service Department of the Interior, U. S. Government, the Children's Museum in Boston, and the Massachusetts Historical Society in Boston.

On the night of Sunday, May 0, when the Tactical Police Force were sent into the Hem-enway St. area, at approximately 12 midnight (I am not sure of the exact time, it was sometime be-tween the hours of 11 p.m. and a.m.), I walked to Westland Ave. to visit a friend there. At Westland Ave. near the junction of Massachusetts Ave., I witnessed approximately 75 to 100 police of the Tactical Police Force massing and getting ready to enter the Hemenway St. area, where students had been holding block parties for the preceding four evenings. 1 also saw about 4 or 5 police dogs who were driven to Westland Ave. in a police car labelled K-9, I saw the police march in formation toward Hemenway St., I clearly heard one member of the Tactical Police Force on the way to Hemenway St. say exactly, "I'll get one for you," to a policeman who was remaining behind in the car. At this point I decided the area was unsafe, and was told by other area residents that I would probably be beaten by police if I attempted to return to my apartment. I went to the Northeastern Student Center where I remained until 4 a.m. when I heard the police had cleared the area.

EVENTS LEADING UP TO POLICE ASSAULT AT 110 GAINSBOROUGH, APT, 14

On Sunday evening, May 10, 1970, my husband and I, along with various neighborhood friends, were observing the activities on Hemenway Street from our living room window. At 10:45 we went outside and then at 11:00 we went to New England Conservatory of Music to their Marathon Concert. We returned approximately one hour later and met with friends in the street and stood around the ento our building talking with them and observing the events on Hemenway Street, Mike went into the house and got his flute and was standing near our entrance playing the flute. I was standing in this area with a neighbor girl (Peggy of 100 Gainsborough #1-A). Sometime later I could see the police marching in formation in our direction.

THE ASSAULT

Michael had already started up the stairs and Peggy and I started up the stairs after him, keeping an eye on the advancing police. I then saw them break ran and start running at full speed in our direction. We then started running ourselves. We got through the first outer door which is unlocked. We then got through the second outer door which is locked. The three of us were standing at the outside of our apartment door (the first door inside the outer doors) Mike attempted to get the key in the lock and open the door. As he was doing this the police broke the windows in the outer doors and then burst into our build-ing, breaking through the locked outer door. Without any remark to any of us, six to eight policemen started beating us with clubs as we stood huddled, facing our apartment door, "we live here — we live here." They stood and beat us, yelling someone hand and the keys in his

and I behind her. Our backs were we lived there, Mike and I each received five blows that were visible afterwards, and when they were through beating us they immediately left the building and we got into our apartment and locked the door.

IMMEDIATELY AFTER THE ASSAULT

For over an hour we were un able to leave our apartment to go for medical help. Mike and I were both bleeding from the head. Medics who were on hand in the building tended to our wounds as best they could with alcohol but said we needed med ical assistance. We were afraid to go out of the apartment for assistance because of what we saw going on in the streets - by lying on the floor in the living room (with the lights out) looking out the window. The police were moving up and down Gainsborough Street striking cars and the fence with their clubs as they walked along. Some of the po-licemen stood at the intersection of Hemenway and Gainsborough shouting remarks up to people in their apartments. I also saw them chasing a boy down the street and he was velling "I'm leaving I'm leaving" as he went by our window at a full run. We were afraid to go out into the street to get to our car for fear of being beaten again.

EXTENT OF OUR INJURIES

After the streets had been empty of police for a few minutes (just over an hour from the bearing) and we saw that other people were leaving for medical help: we went to our car which was parked in front of 128 Hemenway and announced we were going to the hospital. Bob Donovan of III Gainsborough, Apt. 1-R was brought to our car and thing to us which was unintelli- we went to Mass, General Hospi-gible. We huddled against the tal—Emergency. Also, Mike was beaten on the shoulders and to the police at all times, only I was beaten on both shoulder turning our heads to explain that blades, the top of my thigh and my left arm. We returned home after 4:00 a.m. and then found Mike had another laceration, so sometime after 6:00 a m we went back to the hospital and he received 2 more stitches and series of head x-rays. We finally got home at 9:30 a.m.

to the Police Complaint Dept. by phone around 6:00 a.m. and were referred to Precinct 4. We called Precinct 4 and were told that we should talk to Captain Russell who would be in at 8:00 am We called back at 9:30 after return ing from the hospital and were informed that Capt. Russell would not be in that day. I asked for the person in charge that day and was told it was Lt. Dow. I then spoke with Lt. Dow, attempting to explain what had happened to us. He said that he did not want to discuss this over the phone and that we should come to the station and talk with him there. We got there about noon, waiting some time to get into his office. Finally we got into his office and spoke with him. We explained in depth the above events and I asked several times to make a written statement. His reply was always 'you are giving me your report'. He said Sgt. Chase would come to see us to investigate this complaint. We said when and he said that day. We emphasized the fact that we wanted someone there that day so the damage to the area could be seen before it was cleaned up. He said if Sgt. Chase couldn't make it someone else would be sent. We went straight home and a couple of hours later Sgt. Scanlin (spelling?) called and told my husband he would be coming to make his investigation of our complaint on THURSDAY MORNING.

The man in 4A said there was no stairway from his apartment to the roof, and they knocked him down. Then they kicked in the doors to 4B (dam age to door is very apparent) and also 4B's door. Early Monday morning, May 11, 1970, at about 12:45 a.m. I heard people running and shouting down Symphony Road from Hemenway St. When I looked out our window which faces Symphony Road I saw helmeted police with clubs chasing people down Symphony Road. When some of these people ran into our building the police followed and smashed two windows next to our front door in an attempt to enter the building. When the 4 or 5 policemen started to return to Hemenway Street they were velling obscenities and one policeman charged a Volkswagen directly across from our window and, for no reason at all, tried to break some windows in the bus. There was no one in the bus or anywhere in the area of the bus. After this they continued down the street smashing apartment windows in-discriminately and continuing the yelling of obscene phrases.

Hemenway Street riot study nowa criminal investigation

That night, in what one Boston official That night, in what one Boston official called, "the worst case of police over-reaction in recent Boston history," police charged down Hemenway and Gainsborough Streets, clubbing everyone in their way; they forcibly entered several buildings, including NU dorms at 115 and 157 Hemenway and 90 The Fenway; they smashed open apartments, clubbed the residents indiscriminately and destroyed furniture and personal belongings.

WNEU becomes WRBB--fm

If you have turned your radio dial to 500 in the past several weeks and encountered silence, you have discovered the hard way that WNEU has seemingly vanished, yet although not on the air, the situation is far from silent in the WNEU-studio complex.

Walls are being torn down, equipment modified, studios remodelled, policies formulated — all in preparation for September when WNEU will officially return to the air as WRBB, Boston's newest FM station.

Began in 1963

The advent of WRBB is the culmination of the growth which has characterized Northeastern's radio station since it was begun in 1963. At that time, as WNEU, it operated from a small room in the basement of the old Ell Center.

When the new Student Center was completed, WNEU moved up to its present location on the fourth floor, with three-anda-half rooms and more modern equipment.

In the following two years, the record library was expanded and two more offices were added. But the most noticeable change of all occurred in the fall of 1968 when WNEU changed its format from top-40 to progressive rock.

It was not long after this when talk of becoming an FM station started, but the preparations were not begun in earnest till last fall.

Telegram

Finally, in the spring of this year, WNEU received a telegram from the Federal Com-

munications Commission in Washington, giving approval to construction of a tenmute deductional FM station. The trouble with this news was that the frequency assigned to the station was 91.7 megahertz, a frequency already occupied by WBRS of

Despite the fact that WNEU's consulting engineer proved to the FCC that its signal would in no way interefere with WBRS, a time-consuming legal battle ensued, with WBRS lodging a complaint to try to prevent having to share 91.7. The dispute continued for several months before it was resolved, and WRBB became a reality.

Radio Back Bay

WRBB stands for Radio Back Bay. It is the intention of the staff to serve the Back Bay area with a balanced program of rock, blues, jazz, folk and public service presentations. Curriently, a definite format is being decided upon by Division A Program Director Marc Cohn and Division B Program Director Rog Richard, who is, incidentally, one of three active staff members who have been with the station since its earliest stages. Tentative plans for the fall involve remote broadcasts from the Quadrangle during Freshman week.

When it's all completed, WRBB will be a far cry from the station which once broadcast in a room about the size of a broom-closet. And with a potential listening audience of over a million now available, the phrase just another college station may well become as obsolete as the name WNEU.

Tuition hike is official

when the rumors became reality, hut as it stands now, tuition for the '70-'71 academic year at Northeastern has been raised \$150

The news leaked out early last spring but it was primarily rumor and speculation. The most substantial information came in the form of, "proposed tuition hikes"

Whenever it became official, the fact is that tuition for upperclass, non-engineering students will be \$75 more than the \$700 quarterly fee they had been naving. Freshman tuition will be raised \$50 to \$565 and upper-class engineers will also pay a \$75 increase. There will also be a \$15 increase in the annual health fee,

Both Pres. Asa S. Knowles and Vice President of Business Lin-coln C. Bateson attributed the hike to increases in the operating

expenses of the university.

In a report made last May to the Liberal Arts Student Advisory Committee, increases in sal-ary constituted the major portion of the increased expenditures.

Bateson said that the \$2.7 million increase in salaries was 13.4 per cent over last year's figures "This includes a six per cent cost of living raise as well as a two per cent pey adjustment increase

for those already on the payroll. The remainder of the increase is due to new faculty and staff members," said Bateson.

"Inflation is the major factor involved here. In this economy, everything is on the rise and we cannot be self-contained. What affects the outside world immediately affects us," continued Bate-

'It seems as though these increases are inevitable and we are very much concerned. We are constantly trying to discover new sources of investment to supplement our income and thereby keep tuition down. With the decline in the stock market, this has become increasingly difficuit."

Bateson stated, 'There has also been added financial pressure because of increases in campus activity. We've had to hire more security personnel and give them more equipment. People are also less willing to donate to schools where there has been trouble."

President Knowles added that, "Some other factors are, that the amount of the federal grant for the library has been reduced as well as large sums of federal money to run the computer cen-

Brudney, Worth highlight political activities debate

By LENNIE GAMACHE

The Distinguished Speakers Series began the 1970-71 academic year with a symposium called "Political Activism and the College Community featuring Steven Worth, professor of political science at Northeastern and coauthor of the 'Shea Bill', and David Brudnoy, lecture and contributor to the "National Review."

The symposium, which was beld on Thursday evening of freshman week in Alumni Auditorium, also included Lou Massery, a student government leader at Holy Cross College, Laura Wertheimer from the Massachusetts Young Americans for Freedom, and Mike Kelly, a candidate for governor for the Socialist Workers Party, Gene Burns, talkmaster for WEEI (CBS Radio in Boston), was the moderator for the night's discussion.

Mr. Burns kicked off the program by asking each of the panelists to present a five-minute opening statement on the topic of student political activism.

Brudnoy, who is also a Northeastern faculty member, opened by saying, "We're here to explain the range of student activism. Others here will feed your egos; I will deflate them." He went on to criticize 'student sollderive and his radical philosophy. "Involve yourselves and let others do the same," were Brudnoy'e final words of warning.

Mike Kelly directed his comments toward Senator Edward Kennedy's recent remerks on student activism. He noted how students were not only being "repressed by Spiro Agnew, but also co-opted by Kennedy to join the democrats.

"The present student violence does not compare with the bombs in Vietnam, attacks on the Panthers, and beatings and murders by police in the ghetto," said Kelly

He further added, "The only way for people to solve these problems is by taking them into their own hands." He urged students to join groups like the Student Mobilization Committee, women's liberation, and the so-cialist party in a move toward real freedom.

Lou Massery didn't have as many answers as his fellow panelists seemed to come up with. He posed many questions, primarily asking students, "What can we

For the most part, Pres. Knowles' report oeeds oo comment. What can we say when the president of our university writes about the faculty's "imegined horror of outcar war or war in Vietnam?" When he attacks "allienated faculty," not on the basis of their ideas hut as people, willfying them as, in effect, psychotics and farulty? When he accuses students and faculty of demanding power without responsibility while he, himself, abuses the prerogatives of his office by using his annual report for an aoti-intellectual outburst inimical to the most sacred principles of to the most sacred principles of a university?

a university?

Such a report, from any other source, would be ignored. Coming from the president, it canaot be ignored. Some of the issues he raises must be clarified.

1. On violence

Pres. Knowles calls the '60s the decade of violence. Not because of actions by authority, by our governments, national and local, abroad and at home, but because of our youth, who, in the fore-front of dissent against our in-

front of dissent against our in-ternational violence, have been the recipients of a large share of our domestic violence. In a marvelous logical flip-flop, university administrators foul their own nests by identify-ing violence not with war abroad or murder, crime, and bestings

at home, but with students peacefully though firmly protesting (perhaps by obstruction) these hrutalities.

hrutalities.

The true osture of American violence is not hard to perceive. During assiduously peaceful freedom rides, water registration drives, peace marches and vigits, and political love-ins, remember who used the dogs, cattle prods,

ax handles, shotguns, Mace, CN, rifles, and clubs. Remember whn rifles, and clubs. Knowles raps on campus report

By LENNIE GAMACHE

in a special interview with the News last week, President Asa S. Knowles discussed the report of the President's Commission on Campus Unrest along with the general stude movement here on campus.

Although President Knowles mid that he had not read the coure report, he said. "I'm disappointed in the report It wasn't as forceful as it should have been to dealing with issues, methods, and causes of unrest in regards to the roles of individuals

"We've reached the time when we appoint commission and it is forced to come up with a position which is a compromise due to the give and take of such a group

Knowles continued, "I think there's value in having them bring out the facts, however, they haven't added one new information to what we already know from the press"

Knowles egreed that the Vietnam war should be stopped ee soon as possible and felt that "to stop the Indo-China Wer could remove criticism from a large segment of the student population, however, some students will find other issues '

The president's main disappointment with the report was that he felt it did not deal adequately with the redical element and how to cope with it.

"There is always the problem of the sincere student who thinks he is a revolutionary, but

134

Knowles speaks on unrest

(Centinued from Page 1) universities are not to be set up as platforms of revolution," stated

President Knowles. "The univer-sity president has to stop this."

The president was asked if any effort had been made by the university to "weed out" undesireable students or organizations. We have made no effort to weed out a group," he said. But he noted that any involvement by a group or a student in violence on campus would result in expulsion.

When asked if the university had a file on supposed "subversives." the president simply said that he did not want to answer that question. Mr. Thomas Sprague of the Press Bureau gave a similar answer last year when the News produced a photograph of one of his photographers taking pictures of students entering the ballroom for a meeting of a left-wing organization. According to Knowles there are no FBI agents on campus that he knows

President Knowles was also asked if he thought that remarks and speeches by vice-president Spiro Agnew had made his job any more difficult.

"I don't think Spiro Agnew does anything to upset my job one way or the other. He says some things that have to be said and he speaks for a large group of the American people. They need a spokesman for ideas that are controversial," said Knowles.

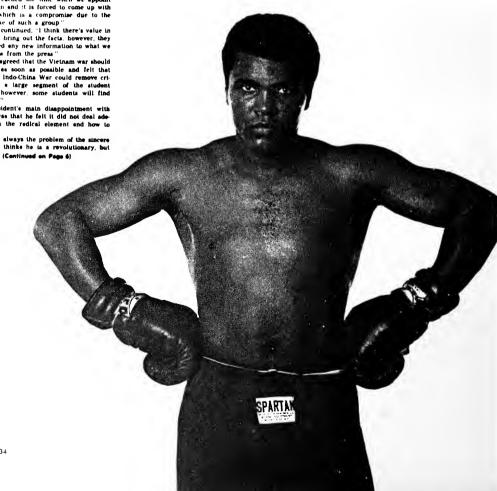

"I find in talking with people that they are fed up with violence and radicalization," Knowles continued. "Our alumni are bitter and fed up. They think I've been

too tolerant, but I think I've been pretty rough. The trustees feel we should clamp down.

Knowles was asked what he thought about Spiro Agnew's negative response to the commis-sion's report. "I don't feel that educators will be affected by Agnew," he said.

Knowles agreed that the silent majority would be affected by Agnew's remarks and it was suggested to him that his job would be more difficult because of this, since public opinion would consequently be less favorable to universities, and donations and cooperation from the public would be harder to get.

Knowles noted, "I'm more interested in what editors of the major newspapers and periodicals have to say about the report."

Sochaki demotes committee

By ENRIQUE DE LOS RIOS

There is one hot issue still unresolved in the Student Ceoter Committee saga: what is to become of the committee?

The Student Center Committee is an advisory board with no constitution or other permanent definition of duties. At the moment, the committee depends on the director, Dean Sochaki, for approval of its actions.

The role of the Committee has been closely tied to Sochaki who rose from director of the Eli Center to director of Student Activities and Assistant Dean of Students. Sochaki has made it clear that he is loyal to "he who pays my salary" in this case Dean MacDonald and President Knowles. If he disagrees with them and cannot iron things out, he feels he must resign. So as one member of the SCC comments, "master on mistake about it, Sochaki is in no position to work for the atulents if they oppose Knowles or

MacDonald, he has to do their hidding."

According to some members of the committee it is clear that the administration will not allow them to have any real power, only "mythical power" as Mike Putnam, President of Student Council puts It.

Dean Sochaki told the committee last year that it would be a decision making hody and that its decisions would be hinding. This year he made it clear that the SCC's only role is an advisory one and that he would veto any action which he opposes.

The constitution before the committee shall have power to enact any legislation dealing with the Student Center building and its use thereof." Any action taken can be vetoed by the director of the center within two days; the veto in turn can be overriden by a two-thirds major-

The administration has stated that it is going to keep a great deal of control over the Ell building. The administration has a great stake in the building and the students have no right in insisting that it be kept strictly a student center.

According to a memorandum approved by the Vice-President for Administration in 1963, Keneth Ryder, the use of the center would be open to the whole NU

community with students having priority, faculty and administration number two priority, alumni third, and outside groups last.

Several other items have a bearing on the tense situation. Early this term, Sochaki stripped several students of their center privileges for alleged violations without benefit of a hearing by the Student Court and without approval by the committee.

Last year Sochaki gave the committee power to solve the office situation. In a recent memorandum to the committee, Sochaki reversed himself and came out against rewarding of an office to the Student Court and said that the withdrawal of the Black Students Union and UCAR's offices would be appropriate.

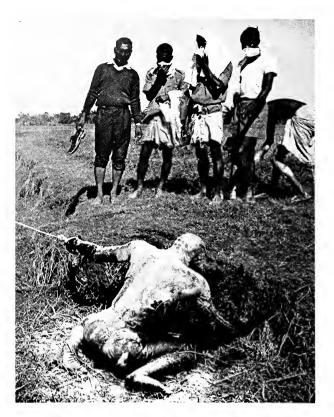

The whole point according to some members of the committee is student participation and more important student control over student affairs.

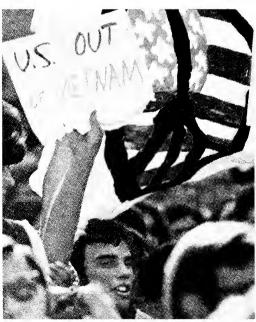

At its last meeting of the term last Wednesday, the committee continued work on the constitution. As soon as some points are worked out with the division A committee, the constitution will be presented to the Board of Trustees and to President Knowles for approval. The committee also elected Joseph Finnigan as its new chairman, Vincent Lembo as vice-chairman and David Powell as secretary.

How the Raid Was Planned

by HUGH SIDEY

A year ago Richard Nixon met with 26 wives of American prisoners. These women, he told his staff, were suffering more than anyone, and yet after years of separation they did not urge the President to settle the war at any price. He wanted diplomatic efforts to secure the prisoners' release intensified. He also wanted his military men to consider an unorthodox rescue. In August Secretary of Defense Melvin Laird came to the White House to report that the POW camp at Sontay had been located and a plan of attack had been conceived, Proceed with the planning, Nixon ordered. In mid-September, the President's National Security Aide Henry Kissinger asked General Leroy Manor and Colonel Arthur Simmons, the chosen mission commanders, to give him a briefing in the Situation Room in the basement of the White House, For nearly two hours, using aerial pictures of the camp, they described the plan. Kissinger liked what he heard and reported his feelings to the President.

Light and weather conditions had to be perfect. There were three days at the end of October and three days at the end of November considered suitable. The special task force was training in Florida as Nixon launched his Oct. 7 peace initiative, offering to release 35,000 prisoners in the South, in exchange for some 3,000 in the North, including 459 Americans. There was no response. The rescue plan took on new importance. October weather in North Vietnam was bad and the planners looked to the end of November. On Nov. 5 Laird stayed behind after a National Security Council meeting and told the President a final decision would have to be made. All right, responded the President, but he wanted a small meeting with key advisers. On Nov. 11 Nixon saw the photographs and detailed plans. With him were Secretary of State William Rogers, Laird, Kissinger and Admiral Thomas Moorer, Chairman of the Joint Chiefs of Staff. Nixon was told the mission had a 50-50 chance of success. There were three main hazards: ground fire might destroy the helicopter flotilla; enemy guards might exceed the estimates; and the POWs might have been moved.

A typhoon forced the scheduled date to be advanced a day, to Friday, Nov. 20. Bombing raids were dovetailed for maximum diversionary effect. On Nov. 20, during a meeting of the National Security Council, Nixon handed a note to Laird. He wanted Laird to know that whether the Sontay foray succeeded or not it was a daring and noble mission. Next day, just before the helicopters were due to take off, Kissinger had a last meeting with the President. Kissinger began to talk about how many helicopters might get out. Nixon cut him off. "That's bad luck. Don't speculate."

In the Pentagon they "watched" the raid progress. Communications lagged only two minutes behind the actual event. The helicopters landed at Sontay on schedule. Kissinger then crossed the Potomac to the White House to be with Nixon. Word came that the small force had left Sontay two minutes behind schedule. That meant either complete success—or that there was nothing there. The White House began planning how to handle the announcement of the rescue of prisoners—if there were any. Hope ran high. Then it plummeted. There was a possibility, the Pentagon reported, that no prisoners had been found. In half an hour the disappointment was confirmed. But it was also learned that no men had been lost. Kissinger sent Nixon a note telling him the news. The President put calls through to Laird and Moorer telling them he had no regrets—the mission had been the right thing to do.

Buddy Miles concert to help Panther Defense Fund

The Student Council decided to sponsor a concert by Buddy Miles, the proceeds of which will go to the Black Panther Defense Fund.

The concert was proposed by a former Northeastern student, David Smith who added that Miles offered to perform free so that all of the proceeds could go to Ericka Huggins and Bobby Seale, presently on trial in New Haven on murder charges.

John Hanson 72LA, president of the student council, said, "The tentative date for the concert is February 11. We have had no hassles with the administration so far concerning the use of Alumni Auditorium for the concert. We mainly have a logistical problem. We have to make sure the NU Band will not be using the auditorium on that day. They have always been very good about things like that. We also have to have confirmation regarding whether or not Miles can make it on that day."

Details on the time and tickets will be given at a later time when the date is finalized.

Officials cancel Miles concert

By MAXINE LIEBERMAN

In meeting Wednesday between Student Council President John Hanson 72LA and Richard Sochack, assistant dean of studeots, it was announced that the administration would not allow the proposed Buddy Miles coacert to be held. Miles had offered his performance free so that all money collected could be donated to the Black Pauther Defense Fund.

"There were a lot of reasons for this decision but they all boil down to one main reason. No matter what stand the university takes on this, it will be a political stand. It's an area the administration thinks is too highly controversial to be involved in either a pro or con stand," explained Sochecki at a Student Council meeting Wednesday night.

Hanson asked if the real objection to the concert was that the money will be going to the Panthers. Sochacki replied that "No matter what occurred it would alienate part of the students."

According to Sochacki, the decision was made by Deans Gilbert MacDonald and Christopher Kennedy after an unidentified alumnus complained about the proposed program. President Asa S. Knowles was not included in the meeting but was aware of the decision. Sochacki said.

aware or the decision, Sociaecki Said.

Hanson tried to obtain the name of the alumnus but was informed by Sochacki that the name was being held in confidence.

When contacted at his bome later Sochacki elaborated, "the auditorium is a special area. The Student Handbook points out that it is a special area that cannot just be used for anything. The deans in student affairs feel that this decision is in the interest of the entire community.

The Student Council asked for a written statement of the decision and the reasons behind it from Sochacki and MacDonald, who agreed to the request.

Student Council will also ask the Student Center committee to give them permission to use the Ballroom for the purpose of bolding the concert. Corresponding Secretary Vinnie Milaiko 71BA, said, "This is an important motion and we will try again."

Miles to go as we sleep

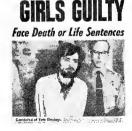

In a swift display of arrogance this week, the administration cancelled the Buddy Miles concert which, sponsored by the Student Council, was planned to raise funds for the Black Panther Defense Fund. The rationale for this action, according to university officials, is that if such an event were allowed to occur on campus facilities, the university would be taking a political stand, implicitly in support of the Panthers.

We find this logic twisted, the action hypocritical, and the motive in deep question. The suggestion that the university avoids taking "political stands" by barring people on campus is clearly absurd (did the University of Massachusetts take a political stand last summer by allowing the State Democratic Convention to use its facilities?); indeed, by barring a group from campus, the university does take a political position — against that group. The cancellation becomes even more ludicrous in the light of those organizations which the administration has allowed to use campus facilities, including Dow Chemical, G.E., the U.S. Army and innumerable political spokesmen.

The heavy-handed cancellation makes a mockery of the administration's own words and demonstrates once again President Knowles' willingness to use repressive tactics when it fits his political whims. Exactly one year ago, at the time of the controversial General Electric strike, the administration decided, over some protest, to allow G.E. recruiters on campus on the grounds that "one of the principal issues on American campuses . . . has involved the preservation of academic freedom and personal freedoms of students in an era where activist minorities have sought to impose their views on others. . . . " If a handful of administration officials thwarting the desires of Student Council (which Knowles referred to as the "representative voice" of the students when the council happened to agree with his ROTC position) is not a violation of academic freedom, then we do not know what is. If, as Dean Sochacki intimated to the Student Council, that the decision came about after the complaint of a single alumnus, then the duplicity of the matter is all the more apparent.

Asa Knowles and his cohorts must not mistake the current lull in student activism for an opportunity to ignore student opinion and student rights. The issues of for whom and by whom the university is run have never been settled at Northeastern, and it is this kind of crude tactic by the administration which could re-open old wounds.

Devlin condemns imperialism

By MARY GELINAS

Bernadette Devlin stated last evening she was thankful that "American imperialism hadn't stuck it's nose into Northern Ireland."

"At the rate your government kills people, we wouldn't have lasted," continued the 23-year-old member of the British Parliament during a press conference before a speech to a sell-out crowd in Alumni Auditorium.

The MP from Mid-Ulster condemned violence of any kind no matter what the cause. "I condemn the people being killed by anyone. Most of those killed in my country have heen killed by the British Army."

Devlin compared the movement of working class in Northern Ireland to the struggle of the blacks in this country.

She said both groups are "fighting in the countries they find themselves, but our principles are international."

Referring to the "Free Angela" button she wore she said, "The people in my country sympathize with Angela Davis, Dan Berrigan, Bobby Seale, Ericka. We appreciate them because the same thing is going on in Northern Ireland.'

Emphasizing that she is fighting for not only the Catholic minority in Northern Ireland, but for the working class in the country she said. "The eradication of poverty is a class issue."

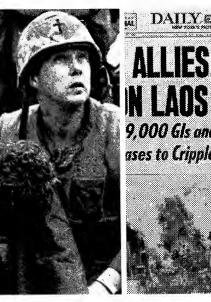

When asked if she had been in touch with her colleagues in the British Parliament during their discussions of the Irish situation, she reported that when people are suffering, starving, and being murdered, the situation is beyond talking "especially in a place as irrelevant as Parliament."

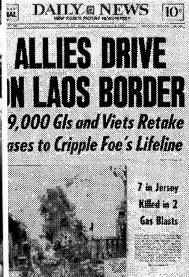

"People are more important than money," she said. "And when systems come in the way of people and survival, the systems must go."

Devlin, indicating that five percent of the population of England controlled 85 percent of the wealth of the country, said, "It is my avowed intention to make trouble for those people."

Devlin's speech, part of Northeastern's Distinguished Speaker Series, was her sole appearance in Boston during a month-long tour of the country to raise funds for the civil rights movement in Ireland.

State chides police on Hemenway

By MYRON BURTMAN

Last week the Civil Rights Division of the Massachusetts Attorney General's office released its report on the Hemenway Street incident of last May 11. The report says that police involved in the incident used "excessive force."

According to Assistant Attorney General Wayne Budd the report shows that "some police officers destroyed property and assaulted people." But he said there is little possibility of criminal prosecution against the officers involved because out of the 99 complaints filed, no one could identify any of the officers.

In the report, which has been submitted to Attorney General Robert Quinn, Budd

said it has been recommended that "administrative action" be taken at the department level against the officers.

This is the third report to be issued on the Hemenway Street incident. Last July the Boston Police Department and the Mayor's Office of Human Rights released theirs. Both basically say the same thing the Attorney General's does although the police report insists that officers had been "lured into a pre-arranged attack."

Although all three reports recommend that some type of action be taken against the officers involved, none has been taken by the Boston Police Department as of this date.

LA gives racism course full status

By JOANNE McMAHON

The Liberal Arts faculty voted Wednesday to establish "Analysis of American Racism," a studenttaught course, on a permanent basis beginning this spring.

The course, which began as a non-credit trial course in 1969, was granted academic credit a year ago on an experimental basis against some faculty protest that students were unqualified to teach a university course.

Since that time the course has been supervised by a committee consisting of five students and five faculty members of the Lib eral Arts college. The committee is chaired by Prof. James A. Me deiros of the political science department.

The LA faculty acted this week on the committee's report which recommended more effective ways to conduct the course.

The committée evaluated the course by visiting classes and interviewing students taking the course.

The overall student response was very favorable. According to the report, "All those who commented on the subject matter of the course itself (i.e., racism in America) found it valid and highly relevant. It was thought to be of importance not only to small-interest groups, but to society as a whole."

The LA faculty agreed with the committee that the course be offered during the fall, win-ter and spring quarters each ter and spring quarters each year, and that students enrolled in it. receive four quarter-hour eredits upon completion. The course will be supervised by the Dean of Liberal Arts.

A permanent committee, composed of two faculty members of the college and two undergraduate students, will select a faculty advisor who will also be chairman of the permanent commit-

The function of this committee will be: to choose a qualified student to instruct the course; to act as a board of appeals in the event of student-teacher disagreements concerning the operation of the course, its requirements, and grades; and to provide office space for the teacher for conferences with students.

Criteria for choosing an in-structor will be that he or she must be an undergraduate stu-dent at Northeastern, and must demonstrate to the permanent committee ability to organize and execute a student-taught course.

If the committee finds no qualified student available after taking every reasonable means to select a student teacher, the course will not be offered for that particular quarter.

Enrollment will be limited to 20 students per quarter in order to maintain the seminar format of the class, and an attempt will be made to balance enrollment among students hased upon year of graduation and academic ma-

The dean of Liberal Arts will determine payment for the student teacher.

great doubt about who is really responsible.

Calley is a product of our society and he was trained by it to do a specific job. To kill the enemy whenever and where-ever he found them. Kill them, count them, report them. That was the job we gave him and trained him to do.

He did his job in an examplary fashion. At My Lai "everyone," said one witness, "was the en-emy." He killed them. The soemy." He killed them. The so-ciety that trained him to do this stands condemned along with him. We are as guilty as if we ourselves pulled the trigger.

But Calley means more than

this He means that we must examine our very precepts. How much difference is there between him and the crew of a B-52 drop ping 15,000 bombs on a set of map co-ordinates that translates as a village never heard of before and never to be heard of again. napalm on people he never sees innocent or is he too a "war criminal" guilty of atrocity. Who is really guilty? The pilot, who flew the plane to the target, the navigator who gave him directions, the bombadier who dropped it, the crew which armed it, the people who ordered it, those who decided it was necessary, the people who huilt the it, those who decided it was necessary, the people who built the bombs or the plane, the politicians who vote the funds, or we the people who allow it to go on?

All had knowledge. All knew the purpose of their actions. All

were carrying out lawful orders. All but us the people who allow it to continue, allow the vicious cycle to happen and keep on Whose orders are we obeying? Who is our Hitler?

Who is our Hitter?

If Nuremberg was a mistake than Calley is a tragedy. If they send me to Vietnam and tell me to kill and I refuse citing Nuremberg and Calley can they try and condemn me to death for doing what I was taught? But if I do kill will they call me a war criminal too and sentence me?

Will the Senate indict Nixon, Abrams, and Moorer as the allies did to Goebbels and Goering? If Calley is guilty of murder then they are at least equally guilty They gave the orders which the man they trained carried out Will the American people indict themselves for allowing this whole vicious war to continue with many Calleys and My Lais not yet known and more to come?

What kind of hypocritical barbarians are we who can con-demn a man for carrying out our wishes?

Who then committed murder? Are we not just as guilty as Calley and the other men in his company? Homicide is homicide to kill with malice aforethought. Who is the murderer and who is the victim?

To kill. If there is one thing we can do better than any other people in the world, it is that. Kill. The United States has de Nil. The United States has de-veloped it to a fine art. Com-pared to us the Nazis are pikers. Gunships, mini-guns, M-16s, B-52's, sensing devices, etc., etc., ad nauseum. Death.

We are the ones who allow it to continue, year after sickening year. 10 sickening years, and for what purpose? So Standard Oil can make more money? For national honor? Because its the only war we've got? For what purpose, damn it? Somebody, anybody, tell me why I should die

Trustees decide 'no grad speaker' after rejecting student proposals

The Board of Trustees has decided that there will be no commencement speaker at this year's graduation ceremonies.

In a meeting last Thursday with Dean Gilbert G. MacDonald, Vice-President of Student Affairs, the presidents of the class of 1971 were told that the list of proposed speakers, presented by the Class Board and Adult School Board, was totally rejected. However, the trustees have decided to present one honorary degree.

The reasons given for the rejection of a speaker were that, the ceremony was too lengthy, and the students were not interested in listening to a speaker. It has also been the policy not to have someone who has spoken recently at Northeastern or in the Boston area.

President Asa S. Knowles feels these reasons "are justified. On a hot day in the Arena, it's an ordeal to sit for four hours. There is just too much restlessness in the andience.

The rejection of a speaker was not announced to the student body, although, it was made by the trustees on March 3. Steve Goldberg, President of the Class of 71 remarked, "If we had not gone to Dean McDonald ourselves, we would not have known about this decision. I feel that we have a right to know what is going on, and if we can do something about it.

The list of speakers, presented to the Board of Trustees by the students through President Knowles, included Charles Garry and William Kunstler, controversial defense lawyers for the Chicago Seven, Cesar Chavez, and civil rights advocates Julian Bond, Coretta King, and Ralph Abernathy.

Other proposed speakers were anti-war activist and famed pediatrician Benjamin Spock, Ralph Nader, Senator George Mc-Govern, Supreme Court Justice William O. Douglas and Canadian Premier Pierre Tru-

President Knowles said that "You turn off the public by having someone like Kunstler speak. It's embarrassing to the university. To have one of those recom-mended speak would cost us the public image. The radicalism is so bad that many colleges have lost their prestige and admis-

Seniors vote 'yes' for grad speaker

By ROBERT DORLAND

A mass meeting of 900 seniors voted Tuesday in favor of having

a commencement speaker.

The meeting had been proposed by the News, so that seniors could present their views about commencement to President Asa S. Knowles and Gilbert G. MacDonald, vice president of student affairs. The meeting was the result of a controversy that began last

At that time, senior class representatives presented a list of twelve possible speakers to Knowles and MacDonald to be given the Board of Trustees, which is in charge of commencement. The president told the class representatives that he didn't think he board would approve any speaker at all because it was the feel-

ing of the trustees that the graduation ceremony was becoming too lengthy. In order to shorten the ceremony the board was considering the idea of dropping the traditional commencement speech

The class representatives then tried to arrange a meeting with the Student Affairs Committee of the Board of Trustees which han-dles student complaints. The fall term ended before a meeting could

On April 2, the presidents of the senior class, Steve Goldberg (TIChE) and Lorraine Corneau (TIBA) met with MacDonald and were informed that the Board of Trustees met on March 3 and had de-cided against having a commencement speaker.

The meeting began with Knowles giving a brief account of the series of events leading up to the board's decision. This was followed by an explanation of the reasons behind the decision.

According to Knowles, "Northeastern has something unique for a school of its size and this is that we present our graduates with their diploma individually. This is very important to families of students who are graduating and to night school students, some of whom have worked for ten or eleven years to get their degrees.

Since commencement includes graduates from the night school

and the graduate school, as well as the day colleges, graduation has in the past few years taken about four hours to complete. The ceremony is held in Boston Garden at the end of June and as the President noted, "It can become quite an ordeal. I told the class repre-sentatives back in September that we felt that it was necessary to shorten graduation and that as a result we probably would not have a commencement speech."

Knowles says meeting is not representative

By VALERIE THERRIEN

Representatives of the Class of '71 will meet with the Student Affairs Committee of the Board of Trustees on Friday, April 23 to discuss the problem of a commencement speaker.

The meeting was arranged by President Asa S. Knowles after the members of the senior class overwhelmingly voted for speaker in an open meeting last Tuesday. Also to be discussed with the trustees is the possi-bility of having a marshal from each college receive the diplomas instead of having them handed out individually.

Before the meeting with the trustees, the agenda the class board wishes to present will be discussed with Dean Gilbert G. MacDonald, vice president of student affairs. "The purpose of this rule is to make sure that the reasons the students have to meet with the committee are

legitimate," commented MacDon-

He continued, "There is no stipulated number of students that can attend. However, we would like a cross section of representative students present.

There has been only one meeting between students and the trustee's committee in the past, and then there were only five students present.

Asked why the questions have to be checked by him before being submitted to the trustees, MacDonald stated, "We do this so that the committee will be made up of informed members who will be able to answer the questions asked."

When asked how difficult it would be to contact the trustees for this meeting, Knowles said, "It may be hard to contact the trustees. This is a time when a lot of them are in Florida.

Speaker decision reversed

The Board of Trustees has reversed the stand it took in March and has voted to allow a speaker at commencement.

The reversal came about after a meeting between the Trustees' Student Affairs Committee and members of the 1971 Class Board last Friday.

In a statement released by Vice President of Student Affairs Gilbert MacDonald, it was stated that the Executive Committee of the Trustees voted to change its previous action and "reinstate a speaker at the June Commencement." The Executive Committee, the release said, followed the action recommended by the student affairs com-

The same panel suggested that the president and the chairman of the Board of Trustees seek the advice of "appropriate student groups on the choice of the speaker," the release said.

Reacting to this decision, the senior class board said, "We are very pleased about the decision of the Board Of Trustees to allow

the class of 1971 to have a commencement speaker. Now we must work together towards an amicable settlement of this ques-

The class board further said that "Though the time is short, it is our hope that a speaker can be chosen who both has something of consequence to say and whose presence will be a credit to this university."

Although there will be no chances in this year's commencement, it was decided that a committee will be set up to study commencement problems. It will be made up of representatives from the classes of 1972 and 1973, as well as representatives of the faculty and administration.

The released noted that the panel will study the following questions:

· Whether or not to have a speaker. - Whether or not the commencement should be divided and how it should be

- The question of personally awarding degrees on the platform.

12,000 in Washington and another 100-200 in Boston. The number of arrests were extremely high but the attempt to stop the government failed in both cities.

Nonviolent civil disobedience is a completely new tactic for the antiwar movement; however, its final success or failure cannot be measured by any evaluation of the two confrontations thus far.

A few things are quite clear at this time. The new tactic is a viable one which must continue to be directed at stopping the government.

Richard Nixon knows that the vast majority of Americans do not support the war. Yet he persists in the war against Indochina and fills the jails with political activists here.

This means that Nixon will not be influenced by popular opinion. The initial objective of the movement in convincing most Americans that we are waging an atrocious war has been accomplished. 73% of the American people want an end to the war, but as long as these people keep out of the government's way, they will be ignored. This is why the newly adopted tactic must be refined and continued.

If Nixon or Congress ever take any serious action to stop the war, it won't be because demonstrators made a good impression. It will be because the social costs at home will have become too great to bear. The movement's present goal must be to raise the social costs to that level.

Wednesday's moratorium was billed as a legal, peaceful mass demonstration. It seemed to be more of a party than anything else. The rally on the Common has taken the route of all legal demonstrations lately – stagnant and ineffectual. Demonstrators played frishee, drank wine, smoked dope, listened to groups, watched light-shows, and ignored 15 drab speakers.

What kind of commemoration is that for the murders last year at Jackson, Augusta, and Kent? Can people celebrate this or the fact that they've accomplished nothing in regards to stopping the war?

One reason that insane and brutal policemen and hard hats were able to dispose of demonstrators who tried to stop the government at the JFK Federal Building is because the commitment of those 35,000 on the Common did not extend beyond Wednesday's party.

35,000 at Government Center yesterday could have plugged up that area effectively by merely being present.

Its time for students and other antiwar demonstrators to seriously contemplate the meaning of nonviolent civil disobedience and then take constructive action.

People who shout "1-2-3-4, we don't want your fucking war," and live it up on the Common once a year are just as guilty for the war continuing as the other 73% of the Americans who watch the war on television and say, "What a shame."

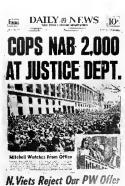

Howard Zinn said, "Let's tell the world that the government has committed high crimes and we want to stop being accomplices to these crimes." We're talking about war and murder and for the people directly involved, it's no party and certainly nothing to celebrate.

The movement no longer means passive action. People must decide just how deep their commitment to peace and justice really is.

it's been a long, long war.

Blacks demand more aid; Officials issue new policy

By SCOTT CAHOON

In response to black student demands here recently, Pres. Asa S. Knowles issued a statement liberalizing financial aid for blacks.

On May 18 about 200 black students confronted Knowles in his office with a list of grievances. The group, consisting mainly of freshmen, complained that blacks are brought into the university under special consideration (Martin Luther King Scholarships), but are classified as regular students after the first year.

Several meetings followed with the Board of Trustees, Dean McDonald, Dean Ryder, Charles Devlin — director of finance — Robert Caswell — director of financial aid — and Daniel Roberts, vice-president of finance, all of which culminated in the revised set of guidelines for financial aid.

Other complaints included the 2.4 QPA requirement for financial aid; the short notice given students on financial assistance; and exaggerated promises of high paying co-op jobs.

The students added that much of the financial assistance was in the form of loans which served to place the students in even deeper debt.

DEMANDS ANSWERED

President Knowles' memorandum, approved at a meeting of the Board of Trustees on May 21, included the following points:

- The 2.4 QPA requirement was waived for all students.
- 2) The number of Martin Luther King Scholars was increased from 50 to 200. In addition, these scholarships are "guaranteed re-

- newable if demonstrated need continues and the minimum academic requirements of the College are met."
- Black students will have no more than 20% of their financial aid in the form of loans.

The administration rejected as "unworkable and unrealistic" demands that 10% of transfer and graduate students be black, and that they also be included in the Martin Luther King program. Currently there is a ten per cent quota of black freshmen.

Administration sources indicated that the initial response of the black students was favorable. "There were a couple of questions raised but I think that by and large the reaction to the President's memo was positive," said Assistant Dean of Students Roland Latham.

The memorandum does not represent a radical change in financial aid procedures. "I think," said Vice-President of Student Affairs Gilbert MacDonald, "that to some extent this has been a little exaggerated. We have the same policies regarding people at the general level."

As to why the black students protested in the first place, Mac-Donald hypothesized, "Most of the students were freshmen and were possibly unfamiliar with the process. It was a combination of lack of knowledge and apprehension."

NEW GUIDELINES

In a later memorandum sent out in response to questions concerning the first memo, the administration agreed "that a Financial Aid Guidelines for Black Students should be prepared spelling out the various programs for aid as well as an explanation of co-operative work."

The administration has also agreed that a closer relationship should be set up between the Office of Financial Aid and black students.

A black student or students will be on the committee that selects the Martin Luther King Scholars.

The memorandum specified that the new guidelines would apply only to "presently enrolled black students;" that is, those students enrolled at Northeastern as of May 21, 1971.

SUBJECT: Abortion Advertising in Northeastern News

Will you please convey to the Editors and Advertising Managers of both the Division A and Division B Northeastern NEWS the following statement:

I have just received information from the University lawyers regarding the publishing of so called "abortion ads" which you have been carrying in the Northeastern NEWS. I believe the law which I will quote below has been violated. Therefore, it is imperative that no further advertising of this nature be carried in the Northeastern NEWS.

I have been advised that the advertisement which was carried on Page 24 of the Northeastern NEWS Supplement dated February 26, 1971 is clearly an offense under General Laws, Chapter 272, Section 20. The penalty for this violation set forth in the statute is "imprisonment in the state prison for not more than three years or in jail for not more than two and one-half years or by a fine of not more than one thousand dollars."

The following is the statement which I have received: "It is illegal in Massachusetts to publish an advertisement indicating where an abortion may be obtained. G.L. 272 s20 provides criminal liability for "whoever knowingly advertises prints, publishes, distributes or circulates, or knowingly causes to be advertised printed published, distributed or circulated, and pamphlet printed paper, book, newspaper notice, advertisement or reference containing words or language giving or conveying any notice, hint, reference to any person, or to the name of any person, real or fictitious, from whom, or to any place ... where ... and advise direction, information or knowledge may be obtained for the purpose of causing or procurring the miscarriage of a woman pregnant with child. ..."

For the image conscious -- failure

(Ed. Note: This article was originally published in the May 14, 1971 issue of the North-castern NEWS.)

The NEWS recently received a request for an

updated description of Northeastern University from the Yele Deily News. They enclosed a copy of the current description, which reads as follows: "Northeastern is a large, mediocre and sometimes troubled college. It's ultra-conservative administratroubled conget. It's distributed water administra-tion blew a gasket when skirmishes erupted during an ill-advised visit by that bard-bat among lingu-ists, S. I. Hayakawa. Its students constitute a fragists, S. I. Hayakawa. Its students constitute a irag-mented mass of in-again out-again scholars who scarcely could be said to form a community. Its vaunted co-op program does provide jobs, but des-pite advanced billing the employment often varies from the boring to the intolerable.

from the boring to the intolerable.

"... The coop program, if followed to the full-est extent, requires a student to spend five years accumulating credits for a BA. Under a trimester plan students speed eight of lifecen four-month blocks on campus, with seven interspixed four-month blocks on the job. ... The results of the month blocks on the job, ... The results of the program, as one might imagine, are confusion, alienation, and disunity. Friendships break and re-form with a rapidity that plays have with emotions. The splitting of all studies into neatly bandled semester courses eliminates depth and precise focus in most of the classroom work.

"Nontheless, there are some co-op jobs well worth the frustrations. Many students win news-paper or television posts which involve real respaper or television posts which lovolve real res-ponsibility, and a few future tycoons have been known to clean up on Wall Street. For large num-bers of others the jobs have proven palatable. But for a substantial number, despite the university's aid in job seeking, the experience has been dis-tinctly inadequate." And the description continues.

tinctly inadequate." And the description continues. My initial receiton was one of irritation; irritation that an Ivy League School would print and read such a blassed, perverted description of my school. Whether my goal is a good job or graduate school, it's the Harvart-Vale-Stanfort drium-verate which leads the way. And they'll form their opinion of my school (at least partially) on the basis of this data.

Then another, more important realization hit. The description is pretty darn accurate. Mediocre is the word to describe Northeastern

Led by an "ultra-conservative" administration, followed by an apathetic student body, throw in an undistinguished faculty and alakazam — you've got Northeastern University. The cited problems — lack of academic quality,

personal scheduling, and poor co-op assignments

—stem from an administration which cares more about money, efficiency, and image than it does about serving it's students.

Repeatedly President Knowles has subverted student wishes and resisted change in the interest of keeping things running smoothly. It would be nice if we were all inanimate objects capable of being sold, hoxed and shipped at a rate of 5,000

being sold, boxed and shipped at a rate of 5,000 per year. But we're not. And worse yet we're not cere presenting a good image.

The recent denial of a graduation speaker was a decision based in large degree on the administration's desire to avoid adverse publicity, to maintain our image. The decision not to allow Buddy Miles to perform during the winter quarter had the same coverige. the same overtones.

But what is this "image" we are preserving? Is it the image of a school presenting a forum for free expression and exchange of new ideas, a university in the traditional sense of the word?

It is the image of a young experimental institution of the control of

tion? Are we trying to develop methods of reforming the educational process which is under attack by all segments of the educational community? Are we taking the lead in minority education? We are, after all, bordering one of the nation's worst

And how about co-operative education, not as a method to pay your way through college, but as an educational experience? But how many of your

No, I'm afraid our image in the eyes of most people in or out of the academic community is

eloser to that presented in the Yele Delly News.

Being Image conscious, I'm concerned that people think the institution which I attend is mediocre. But the worst crime of all is that the administra-tion, rather than attacking the problem of mediocrity, is covering it up, even perpetuating it.

Board to investigate NEWS

President Asa S. Knowles announced Tuesday he had taken the first step in the formation of a special Student Publications Committee which will be charged with recommending "policies and procedures which will assist our student publications in serving the best interests of the entire University community."

Knowles' action — asking for committee nominations from several organizations — was the latest development in a controversy between the **NEWS** and the administration stemming from the paper's issue of Sept. 22, and a simultaneous memo in which the president objected to two stories: one a satire entitled "A Day in the life of . . ." and the other an editorial column entitled "For the image conscious—failure."

Reprints of the articles in question and the president's original memo appear on Page 4. Related stories, letters, editorial and columns appear on Pages 5, 10, 11, 12 and 14.

Aimed primarily at the NEWS, the special committee will also investigate the policies and procedures of Spectrum, the literary magazine; Cauldron, the yearbook; and any other student publication produced with university money.

"In my memorandum to the Northeastern University community on Sept. 20, 1971," the President's Oct. 5 memo states, "I expressed my dissatisfaction with the poor taste and lack of responsibility evident in recent issues of the Northeastern NEWS. I indicated that I would establish a special Student Publications Committee.

"To insure a high level and broadly based membership," Knowles has asked for nominations from each of the following groups: Faculty Senate Agenda Committee (two faculty members); Student Council (two student members); Sigma Delta Chi journalism society (two students); Executive Council of the Alumni Association (two alumni from journalism and publishing); and the Executive Council (two administrators).

The articles in question have been attacked by the president on two grounds. The first, "A day in the life of . . .", which appeared on Page One, was branded as being "clearly an offense against good taste." While Knowles admits "it is not possible to define precisely the limits of indecency," he claims "this issue of the NEWS will certainly dis-

appoint those who are dedicated to the tenets of high quality in student journalism."

A satire, this story dealt with an exaggerated but for the most part true account of dorm life from sexual and drug experiences

In search of truth

to the more inane practical jokes. The word "motherfucker" appeared in this context: "Yeah, now who was the motherfucker that coated my sheets with menthol shaving cream?"

The second artiele—"For the image conscious-failure" — criticized the mediocrity the author found in certain aspects of the university and called for an attempt to correct rather than cover up these shortcomings.

The administration's anger with this issue of the NEWS initially surfaced following the appearance of the paper on campus Sept. 17. Not meant for distribution until the following week, three to four hundred copies were circulated and rumors of

eonfiseation began coming into the NEWS office.

"When this copy of the NEWS first appeared," the president's Sept. 20 memo continues, "several faculty members urged that the paper be confiscated. Others suggested canceling the operating budget of the Northeastern NEWS. I could not agree with either of these proposals..."

One passage from this memo seems to indicate reasons why the above mentioned articles were so strongly objected to: "In many issues of the NEWS in recent years we have seen examples of irresponsibility, half-truths, misstatements of fact, sensational language bordering on the obscene, carping criticism of the institution, the faculty, and the student body, without the spirit of fair journalistic reporting that would also stress the many favorable features on the campus."

Nowhere has the president indicated what these past transgressions might have been.

Among the questions the president has charged the publications committee with studying are:

"How should the faculty and student body participate in formulating the general policies which guide the nature, character and quality of student publications?

"To what extent should the Northeastern NEWS cover campus events and collegiate activities as opposed to national, social and political issues?

"How should the editors and staff members of our publications be selected and to whom should they be responsible?

"What are the reasonable budgetary requirements for the sev-

Attorney general to speak at Volpe dedication

United States Attorney General John N. Mitchell will be on campus Oct. 23 to officially dedicate John A. Volpe Hall, the Criminal Justice side of the Knowles building, the NEWS learned late last week.

On hand for the occasion will be builder, benefactor and Secretary of Transportation John A. Volpe, in whose name the edifice will be dedicated.

As news of Mitchell's impending visit circulated through the university, Student Council Tuesday passed by a vote of 16 to 1 (with five abstentions) a resolution mandating the Executive Council "to inform President Knowles in writing . . . that he (Mitchell) is unwelcome by the student body" and request Mitchell's invitation be withdrawn.

Council also requested that the Student Center Committee vote to block the use of the Student Cen-

The motion, submitted by councilor John Hanson 72LA, declared that Mitchell's presence on campus would be an "insult" to the student body, since ". . . the At-

killings and his exoneration of the National Guard; his approval of the suspension of individual constitutional rights during last Spring's May Day demonstrations; his actions against the New York Times and Washington Post to keen the Pentagon Papers out of print; his subsequent action against Daniel Elsberg; and most recently, "His repeated statements advocating strong line policies against prisoners attempting to convey their de-

mands for prison reform." While the attorney general's visit has apparently not yet been officially announced, invitations have been sent out and were due back in Knowles' office by Wednesday. No students have been invited to attend.

According to Chris Kapton, special assistant to Volpe, Knowles sent out a letter at Volpe's behest to Mitchell requesting his presence at the ceremony.

"It is appropriate that the attorney general should be at this occasion as he is the nation's number one lawman." Kapton explained. This will be the first time two cohinet members will be present at Northeastern.

When informed of council's action, Gilbert McDonald, vicepresident for student affairs, said, "I am surprised that Student Council would be involved in this kind of political activity. I'm sure the students didn't elect them for this."

He explained that he saw the resolution as an attempt "... to deny Mitchell the right to speak, a denial of a freedom that the students and the administration consider fundamental on our cam-

In addition he questioned whether the majority of the ctudent body agreed with this motion and doubted whether the councillors who voted on it accurately spoke for 10,000 students.

The dean of the College of Criminal Justice, Norman Rosenblatt, said, "The Attorney General's coming here has nothing to do with the College of Criminal Justice. He was invited by John Volce. The university exists to allow the airing of all points of view and everyone should have the right to be heard."

Rosenblatt hoped Mitchell will "stress the need to have as many educated, sensitive people as possible entering the criminal justice field." He has called a mass meeting of all students in the college for next Tuesday to discuss the attorney general's appearance.

Trustees' statement

(The following is the Board of Trustees statement.) At a special meeting of the University's Board of Trustees this afternoon a decision was made to postpone until some future date the dedication exercises for John A. Volpe Hall originally scheduled for this coming Saturday. The dedication ceremony had been planned in order to honor the former Mass, governor and present Secertary of Transportation for whom a new University building is to be named. Opposition to the ceremony centered on the choice of Attorney General John Mitchell, who had agreed to give an address dedicating the building which is to house the University's College of Criminal

The Trustecs regretfully decided to postpone the event when a threatened invasion of the campus by radicals from the Greater Boston area seemed to pose a serious threat to safety of students and guests. In agreeing to postpone the dedication of the building until a later time, the Trustees expressed intense indignation that lawless elements on the fringe of the University community seemed quite willing to use force to silence the views of those with whom they disagree.

A resolution passed by the Northeastern University Student Council critical of Mr. Mitchell's stand on civil liberties the Kent State riot and other public issues served to incite support from various radical groups of students and non-students from the Greater Boston area. Handbills distributed in subway stations and on other university campuses urged a mass rally at Northeastern which would physically obstruct the ceremonies and prevent the Attorney General from speaking. On Tuesday October 19 a meeting run by the Northeastern Student Council was infiltrated by substantial numbers of non-University people with many speakers representing local chapters of Students for a Democratic Society and the University Action Group urging physical disruption of the dedication ceremonies. While by a narrow margin the meeting voted to support a Student Council motion in favor of a peaceful demonstration instead of a violent one, the SDS and other radicals present refused to agree that they would abide by the decision.

At conferences held between University officials and representatives of law enforcement agencies, the University was informed that it might expect several thousand radical activists from Greater Boston to descend on the University during the morning of October 23, with the real possibility of a violent confrontation which might involve injury to participants or bystanders.

In reaching their decision, the Trustees were largely motivated

by the following considerations:

(1) A large number of graduate and undergraduate students

will be on campus on Saturday morning attending regular classes. Their physical safety must not be jeopardized.

(2) Hundreds of guests were planning to attend the dedi-

cation. Public officials, many dignitaries, their wives and children, might be endangered by irresponsible activists, willing to use force to attract publicity.

(3) The dedication of a University building should be a pleasant ceremonial occasion bringing happiness and honor to donors who have given generously to support the University and its programs. The threatened disruption has already destroyed all chances of achieving this objective at this time. The postponement of this social event will guarantee that the ongoing educational programs of the University will not be interrupted.

(4) The University is by its very nature an open institution, very vulnerable to planned violence. It is not possible to provide adequate security for the many scattered buildings without turning the campus into a veritable armed camp. This would destroy that atmosphere of freedom and concern for rational behavior and human values which are the very essence of a University community.

Onversity community.

After careful assessment of the risks involved, the Trustees unanimously agreed that possible danger to individuals was too great

to proceed with the original planned ceremony.

the Trustees called upon the overwhelming majority of the students and faculty of Northeastern University to make clear their opposition to those who would turn the University into a battle-ground where political views are promoted by force and not reason. They urged all members of the University community to reject those who have used falsehood and distortion to malign the programs and leadership of the University.

Dedication postponed due to unrest; Student leaders announce victory

By MYRON BURTMAN

At a special meeting Wednesday afternoon the Board of Trustees voted unanimously to postpone indefinitely the planned appearance of Attorney General John Mitchell due to the threat of violent demonstrations.

Student Council termed the cancellation "A victory for the student movement."

The trustees had been informed by law enforcement agencies that several thousand local radicals could be expected to descend on the campus Saturday when Mitchell appeared to dedicate the Criminal Justice building.

Peaceful demonstrations had been called for last week by Student Council to protest Mitchell's appearance on campus due to his stand on civil rights, Kent State, and other is

In announcing their decision the trustees expressed "indignation that lawless elements on the fringe of the university community seemed quite willing to use force to silence the views of those with whom they disagree."

Handbills calling for a violent demonstration had been distributed all over Boston, Cambridge, and other university campuses by Youth Against War and Facism, "(YAWF) Students for a Democratic Society (SDS), University Action Group (UAG) and other extremist organizations.

The trustees further stated that a council meeting held last Tuesday to discuss the type of demonstration had been heavily infiltrated by large numbers of outsiders urging violence. President Knowles stated that one third of those present at the meeting were non-university people but students who were present dispute this.

The trustees also state that the meeting voted to support council's call for a peaceful demonstration by a narrow margin, however, NEWS reporters at the meeting called the vote for a peaceful demonstration overwhelming. SDS refused to be bound by the council vote.

The trustees further state that their decision to cancel the dedication was largely motivated by fear for the safety of visiting dignitaries and their families and for those students who have classes on Saturday morning.

They claimed that it would not be possible to have adequate security without turning the university into an armed camp and

— Barry Novich President Asa S. Knowles

that "This would destroy the atmosphere of freedom and concern for rational behavior and human values which are the very essence of a university community."

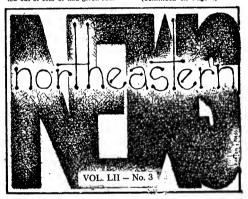

Wednesday night SDS released a statement calling the trustees decision a victory for the people and damning council and the Student Mobilization Committee who they say "attempted at every turn to thwart any call for any real action." They also announced a victory celebration in the quad Saturday morning at 10.

decision Knowles stated that there had been no decision made as to when the building would be dedicated or who would be invited.

He also stated that this action was "no victory for anybody." He denied that the university had acted out of fear or had given radical demands. The decision, he stated, "Was made solely on the basis of assessing what the risks

A week of declarations

By SCOTT CAHOON and HARRY PROUDFOOT

Prior to Board of Trustees' statement Wednesday, ahout 300 members of the Northeastern community, Student Council members and other interested parties called for a "peaceful, legal demonstration" to protest the previously planned appearance of Attorney General John N. Mitchell

Student Council members first learned of the invitation when a resolution condemning Mitchell's proposed appearance was pre-sented to council Oct. 12. The motion, sponsored by John Hansen 72LA and Skip Hartwell 75CJ, expressed student displeasure over the choice of the dedication speaker and mandated the council executive board to send a letter to President Asa S. Knowles informing him that Mitchell "was unwelcome by the student body,' and asking that Mitchell's invita!tion be withdrawn. The motion also called for "appropriate peaceful demonstrations" if Knowles did not comply.

However, when the letter was mailed to the president later in the week, the executive board, while still supporting a demonstration, stated that Mitchell should be allowed on campus in order to protect his right to free speech.

A special session of the council was called on Monday night. At this time, council made plans to circulate a petition protesting the Mitchell invitation and laid plans

for yesterday's press conference.

At Tuesday's meeting, debate centered around two main pro-

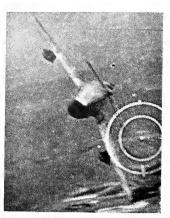

posals. The first, sponsored by the Student Council and the Student Mobilization Committee (SMC), called for a peaceful and legal demonstration on Saturday in the quadrangle, starting at 10 a.m.

At the same time, a joint proposal by the University Action Group (UAG) and the Students for a Democratic Society (SDS) was offered to the body, advocating the disruption of the dedication

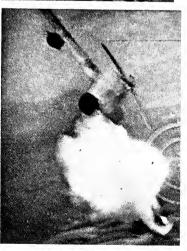

Disruption or the lack of it and the free speech issue remained central themes throughout the three-hour meeting, Supporters of the UAG-SDS proposal felt that free speech was "a baloney issue" compared to the real issue of racism. They felt that because of Mitchell's record, and because he is able to speak to millions of people through the various news media, preventing him from speaking at Northeastern would be justifiable. However, many felt that disruption would be a violation of his right to free speech.

The Student Council/SMC proposal passed by an overwhelming majority.

Following the Board of Trustees decision to postpone the dedication, the demonstration was cancelled.

Publications board appointed

The names of those chosen to the ten-member special Student Publications Committee were announced Nov. 4 by Dean Gilbert C. MacDonald, vice president for student affairs.

Established by President Asa S. Knowles following the Sept. 22 edition of the NEWS, the committee includes four students, two faculty members, two administrators and two alumni working in journalism.

Christine Nielsen 73ED and Mike Putnam 72ED, Student Council presidents for Divisions A and B respectively, and Paula Leavy 73LA and Linda Mongeau 72LA, journalism majors representing the Sigma Delta Chi Journalism society, will represent the student body.

The faculty is represented by Professors Norbert L. Fullington and Joseph H. Wellbank: Fullington, an associate professor of history, graduated from the State University of New York at Buffalo in 1949. He won his masters there the following year, and in 1966 he earned his Ph.D at Harvard. Wellbank, an associate professor of philosophy here for the past six years, graduated from Lycoming College in Pennsylvania in 1954. He earned both his masters and his Ph.D from Boston

University, the former in 1958, and the latter in 1964.

Deans Christopher Kennedy and Catherine Allen are the two administrative representatives. Kennedy, dean of students, is a Physics and Classics graduate of Harvard, and holds a Master of Education from Boston State College.

Allen, dean of Boston Bouve College, has been with the college since 1960. She received her BS degree from the Women's College of Georgia, her MA from Columbia University, and her Ed.D from New York University.

The two professionals are Robert Hannan of the Boston Herald-Traveler, and George Merry of the Christian Science Monitor Both graduated from the Cellege of Liberal Arts here in 1948, and both were at one time reporters for the NEWS.

After graduation, Hannan worked for a time on the Medford Mercury, and is currently the City Hall reporter for the Herald. Merry, who has been with the Monitor since graduation, is a State

House reporter, and has also done free lance writing.

When the NEWS' Sept 22 edition appeared, it was accompanied by a memo from Knowles charging the paper with poor taste, irresponsibility and lack of judgement based on two articles in that issue.

He announced at that time the

formation of the board to study ways of making the **NEWS** more representative in its coverage and personnel.

Dean Kennedy has been given the job of arranging the committee's first meeting, which he hopes will be within the next two weeks.

The committee's final recommendations are to be on Knowle's desk by Feb. 1, 1972.

LEGALIZING MARIJUANA? With
U.S. colleges swathed in somnolence, not much is heard about

lence, not much is heard about the problem of drugs on campus these days. But a Gallup poll released last week indicates that the use of drugs among college students continues to rise steadily. More than half the students admit they have tried marijuana and the sampling of hallucinogens has increased an astonishing 1,800 per cent in five years. Reflecting the frustration more and more law-enforcement officers feel at trying to suppress such widespread behavior, John Finlater, former deputy director of the U.S. Bureau of Narcotics and Dangerous Drugs, last week suggested that the time had come to legalize marijuana.

Building to a climax

By DON LEAMY

It has been suggested by a certain anonymous president of The University that a number of articles have been published in The News for no other reason than for Shock Value. Less perceptive persons among you scoffed at this idea, assuming that The News is staffed by individuals who are reverent, clean, thrifty and modest; well-meaning individuals who struggle to play the role of conscience to a mutiversity, aware that any social structure of 50,-000 or so persons lacks total co-ordination and is fallible.

With this in mind, I find myself about to be Joshua to the Jericho of your precon-

ceptions.

The News does print articles soley for

Shock Value.

Shock Value is a French dwarf whose eyes can be seen peering out, yellow and forbidding, from the recesses of the News photo darkroom. There are stories told about Shock Value, stories told in the dark of morning over cardboard cups of black coffee when the minds of the editors are blurred from fatigue and nicotine. Some say Shock Value was once an accountant for Boston Edison, who fled into obscurity when charged with battery upon an electrician. Some think his current home is a cell in D.C. Others do not think he is alive. Why or how these rumors began, I know not.

For he lives. There have been times when, having gone two nights without sleep while working on the paper, I have seen him skulking about the corridors of the Ell Center.

And then, one night last week, it finally happened. I topple out of the office into the corridor in a state of total exhaustion and fell into the evil clutches of the lurking Shock Value. Before I could even move, he clapped a diseased hand over my mouth, and began whispering his hypnotic commands into my ear. "Relax, Relax," was his static charge to me. His fingers tingled with electric urgency across my brow and my mind began an outage of outrage. He dictated, and I wrote.

In a thrice he captured the minds of the entire staff and bent them to his evil designs. The following is what that evil avatar forced me to write and The News to print:

"That will be all, Richards," said the Lady Botolph.

The butler bade them good evening and closed the door as he left.

The Lady Botolph lipped a sip of chocolate from her cup and smiled with interest. Leon Dana Churchill stood and walked towards her, stopping in front of her chair, staring down. She looked up into his dark, emotionless features, betrayed only by a slight flaring of nostrils.
"You know what I want," he said flatly.

A shadow, part fear and part joy, clouded her pale, thin and hungry features. She said nothing.

"Does the Lady know that the gentle-

man wishes to parker?'

The Lady Botolph placed her cup of chocolate on the end table and leaned forward in her seat. Her agile fingers parted easily the folds of woolen cloth which stood between her and her goal but fumbled on the silk within. His hands flashed down to aid her release of the engorged captive.

Her eyes widened in incredulous disbelief. There it stood! His cabot. A true stetson, nearly an ell long. Never in her wildest dreams had she imagined such a speare!

Suddenly he picked her up in his strong arms and threw her upon the couch. In an instant his hands were within her greenleaf sheath, upon her forsyth, probing for the soft liquid pool of her barletta natatorium.

He lowered his face, began to mugar, and she writhed under the forsyth dental and lingual attentions. Quickly he stopped. "Turn over," he said, "I want it the hemen-

way."

She tried to dodge, but was powerless. forsyth annex. Keeping his hands firmly upon her, he thrust his hayden deep into her knowles. She screamed and cried out, "You're hurtig me, you're hurtig me!" But after a few minutes she lost her will in the gryzmish of their united realty.

Suddenly, from the doorway, a watching Richards shouted, "That's the way to docks-er, Mr. Churchill. Ha, Ha, Leon MacDuff and damned be he that first shall cry, Hold, enough!

Champagne and cake for Zabilski on 100th win of career

By KELLEY LOTT

Northeastern's offensive and defensive units put on an impressive first half performance, which saw the Huskies lead 21-0 in the second period, and then proceed to de-Northeastern's oftensive and detensive unus put on an impressive that had periorimance, which saw detensives like a second period, and then proceed to defeat the Springfield Chiefs 34-16. The victory marked 24-year Head Coach Joe Zabilski's 100th career win and sparked a post-game celebration of cake and champagne. For the third time in the past four weeks, the defense held their opponents to one touchdown. Springfield's only sustained scoring drive came in the third period, although Warren Pena returned a second period kick-off for an 86 yard touchdown. Middleguard Tom Dubie and safety man Tom Rezzuti were defensive standouts. Dubie, who held All American halfback Bruce Laird of AIC to 62 yards last week, had another tremendous game as he was in on every other tackle. Rezzuti, who picked off seven passes against AIC, stole two more along with returning a first period Springfield punt for a 68 yard score. He now leads the Huskies with seven interceptions and has been named ECAC Division II defensive back of the week for the past two games.

Offensively, Al Mello led the Husky attack, picking up 70 yards rushing, passing for 116 yards and one touchdown, and scoring

on 14 and three-yard runs. The offense gained 244 yards on the ground behind the power running Pat Fitzgerald and

Quigg. Tight end Bob Tufts lead the NU air offensive with three receptions for 42 yards. The passing game added 116 additional vardage for a total offense of 360 vards.

SCORING SUMMARY

Rezzuti opened the scoring with only 1:26 gone in the first period with a 68-yard punt return. Chris Hantzis missed the extra point, leaving NU in front 6-0.

With 6:38 remaining in the second period. Mello skirted his left end for a 14-yard touchdown. Hantzis made good the extra point-13-0.

Quigg capped a 64-yard drive after taking a Mello pitch-out around his left end for a 49-yard score, Mello faked the extra point and found Tufts in the endzone for a two point conversion increasing the Husky lead to 21-0.

Warren Pena tallied Springfield's first score when he took the kick-off following Quigg's touchdown and returned it 86 yards. Brian Volo kicked the extra point: 21-7.

Quigg then returned Springfield's kick-off 50 yards to the Springfield 43. Quigg took a Mello pass down to the 12-vard (91.7 FM).

line and three plays later, with only 00:35 remaining in the half, Mello ran it in from the three for the score. Hantzis finished the first half scoring by converting the extra point; 27-7.

Springfield sustained their only drive of the day with 6:43 remaining in the third period. Quarterback Gene DeFillippo found halfback Bob Young in the endzone for six points. Volo converted, 27-14.

With 8:00 remaining in the final period, Mello hit senior halfback Mike Graceffa with a five-yard touchdown pass. Hantzis finished the NU scoring at 34-14.

With 2:45 remaining in the game, Springfield's defensive unit converged on quarterback Phil Raby in his own endzone to end the scoring at 34-16.

Tomorrow the Huskies (3-2) travel to Durham, N.H. to meet the Wildcats of the University of New Hampshire (2-2). Kick-off will be at 1:30 with radio coverage beginning at 1:15 on WRBB

Gridmen stalk UNH Wildcats Saturday; Seek upset of four-year losing streak

By ART MacPHERSON

Saturday at 1:30 p.m. the Huskies (3-2) will travel to Cowell Stadium in Durham, N.H. to take on the Wildcats of the University of New Hampshire (1-3).

In 1966, Northeastern managed to beat UNH, 15-14. The four games since then have all been won by the Wildcats; 21-13 in 1967, 26-3 in 1968, 26-8 in 1969 and 33-7 last season. None of these games could be termed "close." Or, to use Head Coach Joe Zabilski's words, "They've owned us."

Zabilski, who was presented the ball 20 times and gained 100 with his 100th career win last Saturday when his team whipped Springfield 34-16, feels that the New Hampshire game is a toss-up, "Basically," said the coach, it comes down to the defenses. They're a young team that's just starting to jell. They play a very tough and very physical game and they're very, very stingy."

FEWER POINTS

Led by co-capt, and tackle Nelson Cassavaugh, linebacker Ed Booker and defensive back Craig Boatman, the Wildcat defenders have allowed fewer points each week since their opening game. That game, a 40-0 loss to Delaware, preceded a 28-21 loss to UConn and successive wins over Maine (24-14) and Vermont (28-7).

Facing the task of beating this defense is Al Mello, Wally Quigg and Co. Quigg, who leads the Huskies in rushing (276 yards on 52 carries), receiving (17 receptions for 291 yards) and scoring (5 TD's for 30 points), ran for 79 yards on eight carries despite being rested for the final 30 minutes. When Quigg wasn't running, his place was ably filled by fullback Pat Fitzgerald, who carried

vards. Most of his vardage came in the second half on the Huskies' 79-yard march for touch-

Al Mello has apparently wor the starting quarterback role from Phil Raby. Mello has put together two outstanding games in a row, completing 7 of 12 for 116 yards and one touchdown against Springfield. When he is going well, his running ability and roll-out passing to Quigg and ends Bob Tufts and Frank Smart are enough to keep any defense busy. Mello, however, has a his tory of inconsistency and there is no guarantee when he may go sour. If he does, Raby is waiting to take over.

STOP HOPKINS

As for the UNH offense, Zabilski says, "We've got to stop Hop-kins. It's that simple-stop Hopkins and we can beat them."

Quarterback Bob Hopkins is indeed the man to stop. This out-standing senior, who was All-Yankee Conference last year, is a double threat to the Huskies. His play-calling is excellent and his running ability combined with that of Kenny Roberson, a small

(5'9", 175 lbs.) but shifty speedster, enables the Wildcats to control the ball on the ground and minimize the risk of interceptions -a Husky strongpoint, When he does have to pass, however, Hopkins likes to throw play-action passes to his flanker, Bob O'Neil, and his end, Bill Degan, Many of these completions are good for long yardage. If the NU defenders get too intent on stopping the run, Hopkins will take advantage of the lapse and possibly burn

As good as Boh Hopkins is, he will have a far from easy time with Northeastern's defense, which has allowed only 14.6 points per game thus far. The backfield is led by Tom Rezzuti, who has seven of the 18 NU interceptions this year. He also returned a punt for 68 yards and a TD against Springfield, Also in the backfield are safety Gary Hogg and cornerbacks Dave Lockhart and Bob Behrens, who have four, three and one interceptions, respectively.

The linebacking corps of Tom Dubie, Capt. Steve Pizzotti and Dave Moulton, and the line, Pat Kelliher, Dick Baniewicz, Frank (Continued on Page 15)

Frosh lose second game

Unable to sustain an offensive drive, the freshman football team lost it's second game Saturday to Dean Junior College, 19-6. Each time the Huskies managed to move the ball near the opponents goal line, penalties stopped them. The defense scored Northeastern's only touchdown, in the second quarter. A Dean punt was blocked by the defensive line; Dave Baptista picked up the ball and ran in for the 6 points, surrounded by a group of his teammates. Northeastern failed to score on the conversion attempt.

The freshmen, now 0 and 2, play today against New Hampshire. The game is at two o'clock at Parsons Field.

Skaters lose first; Frozen by Wildcats

By ROGER MEDVIN

The University of New Hampshire Wildcats spoiled the season opener for the Husky skaters Monday night at Durham, New Hampshire won 6-4 before a capacity crowd of 4400.

Northeastern put up a good ight against the powerful New Hampshire team, but penalties, especially in the third period, led to the Husky defeat. The winning goal was scored by sophomore Gordie Clark at 5:02 of the third period while the Huskies were two men down, Twenty of New Hampshire's 49 shots were in the final period.

Goalie Boh Smith of New Hampshire turned back 20 of 24 shots. Husky goalie Dan Eberly had 43 saves.

New Hampshire's captain, Dick Umlle, opened the scoring with his first of two goals at 11:40 of the first period. Denis Moffat scored first for Northeastern at 17:07. Clark also scored in the second period to go along with his game winner.

Other Northeastern scorers were Les Chaisson, Wayne Blanchard and Paul Scherer, Chaisson also added two assists

also added two ssists.

Despite the loss, Coach Fern
Flaman was generally pleased
with his team's efforts. Flaman
pointed out that UNH had the
advantage of playing two preseason games with a "tough" St.

Lyons named successor

Zabilski retires as head coach

By RICHARD SOBOCINSK

Joe Zabilski, head football coach at Northeastern for the past 24 years, retired at the age of 64 last week to devote full time to his responsibilities as Associate Director of Athletics. Assistant coach Robert "Bo" Lyons was named as his successor.

Zabilski has coached his teams to 101 wins, 77 losses and six ties over the 24 years.

Lyons, 45, served in the capacity as line coach for the Huskles for the past nine years. A 1939 graduate of Northeastern, he captained the squad in 1957 and as a center, both offensively and defensively, he was selected to the 1956 and 1957 All-New England teams.

During Zabilski's reign as head coach he was voted Coach of the Year by the New England Football Writers in 1955 and again in 1963. United Press International named him Coach of the Year in 1963 and 1967.

His most successful year was 196; when the Huskies finished their first undefeated and untied season with an 8-0 record, earning them an invitation to the Eastern Bowl. in Allentown. Pa.

Zabilski came to Northeastern in 1948 from the University of Maine where he served as line coach. Until 1958 he combined his talents as head coach of football and basketball and was the weights events coach for the track team. In 1958 he was appointed Assistant Director of Athletics after relinquishing his basketball and track coaching duties. Last year Zabilski was appointed Associate Director of Athletics.

Citing his reasons for retirement, Zabilski quipped, "Foothall is a young man's game and now is the opportune time for me to leave, while I still have good health and while Northeastern has such an able replacement available."

As Associate Director of Athletics, Zabilski has set no definite goals, but says he will be on the line fighting for better facilities and the establishment of a "more meaningful" athletic program including Northeastern's admittance into a regular conference.

When asked to cite his fondest memory, Coach Zabliski, in the typical Zabliski style, said, "My boys are my fondest memory," noting that all his football players have worked under adverse conditions (combining school and co-op) to play a game they love.

Coach "Bo" Lyons plans no "obvious" changes in the Zabliski strategy saying, "The kids and coaches are familiar with the system so there's no reason to change only for the sake of change." The transition from line coach to head coach should be an easy one for Lyons, who coached both the offensive and defensive lines during his first three years at NU. He admits missing the two-way action,

Football team ends mediocre year

By ART MacPHERSON

Another football season has come to a close, and life goes on as usual. What little excitement the nine games brought was overshadowed by the retirement of Head Coach Joe Zabilski after 24 years as NU's football mentor. After winning 101 games, Zabilski decided to devote full time to his duties as Associate Athletic Director.

The new coach, "Bo" Lyons, will have his hands full trying to build a winning team out this year's juniors' and sophomores. The starting quarterback will probably be marvelous Al Mello, unless Jim Lazo can come up from the freshman team and take over. So much for the offense.

The season was pretty much a disappointment in that the team was murdered against the weaker teams, and then did well against its strongest opponents - Harvard and Holy Cross. However, next year looks better because neither the Crimson nor the Crusaders will be on the schedule. They will be replaced by two real heavies, B.U. and Hofstra.

The offensive standout this year was Wally Quigg who led the team in scoring (42 points) and receiving (31 for 539 yards), and was second in rushing with 472 yards. Pat Fitzgerald was first with 491 yards.

On defense, Tom Rezzuti had an unbelievable season with 14 interceptions, which set a Northeastern record. The rest of the team had a total of 13 steals.

Track season here

The track season is approaching! And the home opener is on December 11 at Cabot Cage vs. Brown.

Steve Hogan and Charlie Vann will be back in the dash this year, and they should give the Huskies one of the best 1-2 dash teams in New England, A major part of the team's success depends on the achievements of the hurdlers, led by Tim Sweeney and Peter Sabii.

The distance runners, despite a lack of experience, look promising. Paul Horrigan and Ralph Moschella are the top men in the 600, while the 1,000-yarders are led by Simon Langer. The mile is set with Larry Joseph, coholder of the school record at 4:14. Following him is Dave Goldsmith, who has run the event in 4:16.

The problem with senior Ralph Bowman is that no one is sure where to run him. He has been timed in 1:12 in the 600, 2:10 in the 1,000 and 4:14 in the mile. Assistant Coach Everett Baker feels that, "Bowman is capable of settling school records in all three events."

Last year's field events team was plagued by inconsistency in the high jump. Changing this should prove to be the added lift they need to challenge Harvard for the Greater Boston Championship. The top high jumper is Tom Murphy, who is also a long

All Hail

'Grad Primer'

By Kristen Kingsbury.

Oh, look. See the big place. See all the people. Smell the funny odor. The circus has just gone away. Why are all these people here? They have come to see a better circus. It is called graduation. Why are there no animals? Because this is a clown show. It is the largest clown show in America. But nobody is laughing. That is because it is not funny. Why are these clowns not funny? Because they are being let loose into the world and will start running things. Oh. You are right. I do not see anything funny about that.

Oh, look. See the man in black? Is he a magician? In a way; he gives each graduate a magic piece of paper and makes him smart. How much does the magic paper cost? Oh, about \$10,000. Say, that is a lot of money. Not really, when you consider how much magic is needed to make these people smart.

Oh, look. See the people with the funny looks on their faces. Who are they? They are the parents. Oh. They must be very proud that their children are getting smart. No, they are surprised that it didn't cost more.

Oh, see the man talking. Who is he? Nobody knows. He does not have to be anybody at all. He just has to talk for an hour to give the graduates a nap. Why do they need a nap? To sober up so they can stand up and walk to get their magic paper. Oh.

Oh, look, look. See the funny man waving his arms. Who is he? He is the marshall. Where is his silver star if he is a marshall? He does not need it; he is a different type of marshall. He uses just a stick to keep law and order? That is right. He wanted a gun after last year, but they would not let him have one. Oh.

Who are all those men in the colored hoods, smiling? They are the professors. They already have magic papers. They are smiling because when the graduates get their magic papers they will not come back any more. Oh, don't they like the graduates? No. They think \$10,000 is not enough for a magic paper. They wanted the graduates to work, too. Oh, they are bad people.

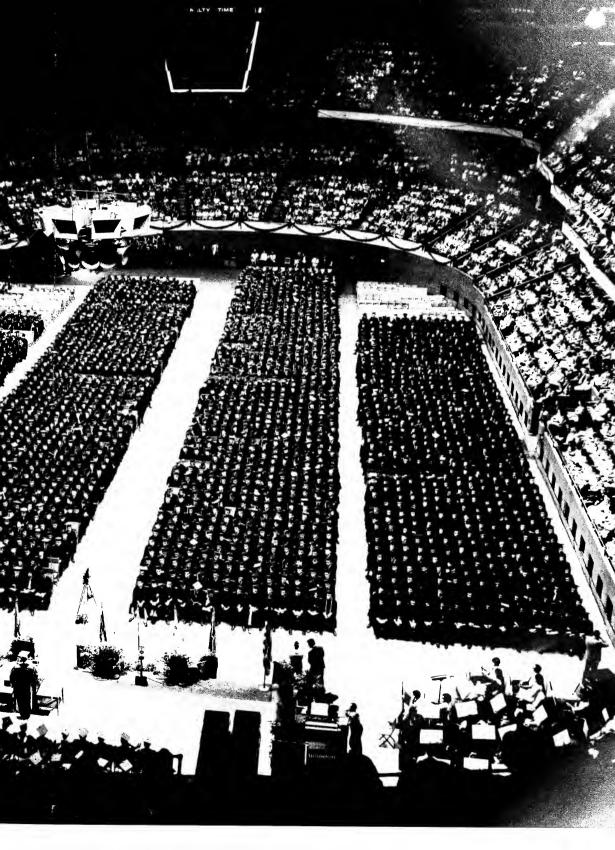

Say, why do the graduates look so serious? They are thinking about great questions that face them now. Oh, what great questions? They are asking themselves such great questions as, "I wonder if Uncle Fonsey will give me a car or those stinking savings bonds?" "Will I have to go to WORK now?" and "How can I get rid of my parents so I can get drunk?" Say, those are great questions.

Say, why do the graduates wear those funny flat hats? Their hats are not flat; it is their heads. Oh. But why are those strings hanging from them? Those are called tassels. When they swing back and forth, they hypnotize the graduates into believing what is on the magic paper. Oh.

Who is that strange woman winking at all the male graduates? Oh, her, she has just seen too many movies.

Say, who is the man with the red, white, and blue hood and the barber shears? He is the man from Uncle Lyndon. He is giving the graduates a chance at a large grad school. Oh? How much will it cost? An arm and a leg. Oh, that is expensive. Yes, but they get free vacations in the tropics. Isn't that nice. Yes it is, if you're not eligible.

The Collected Wit and Wisdom of Asa S. Knowles

Asa Smallidge Knowles 1967

It is a privilege to extend greetings to the class of 1972 and to welcome you to Northeastern University.

As students at Northeastern you will participate in a unique form of higher education. A degree from Northeastern represents all of the academic studies taught in the traditional four-year college, in addition to professional experience in the field of your choice. The result is a superior education characterized by a strong sense of career motivation.

During this week, you will be enrolling in specific colleges, courses and curricula. In so doing, you are signing up, in a larger sense, for full participation in the experience of college life. Soon you will be associating with students from different parts of the country, and from oversea nations as well. You will be exposed to faculty members of diverse and opposing points of view. You will be asked to assume a degree of responsibility such as you have never known. There is no academic credit given for the education that will result from these experiences, but success on the college campus, in and out of the classroom, can determine the pattern of a lifetime. Much will depend on the competence and maturity with which you conduct your affairs.

You are beginning your education in an age of great opportunity. Many career fields are open only to the college graduate. Although our nation places a great premium on education, it expects much of its educated men and women in return. As graduates of this University, you will be richly endowed with the ability to serve mankind. May God guard and guide your individual paths to excellence.

1972

My sincerest congratulations to all graduating members of the Class of 1972. During your years on campus, both our society and our educational institutions have undergone dramatic and far-reaching changes. Women and minority groups have assumed new roles. The church, the government, and business and industry have developed positive attitudes of cooperation and social responsibility, and intellectual revolutions are continuing in the field of higher education.

These changes have come in an age more socially aware than any other in our history. They are not ends in themselves. They signal the beginning of a trend in society to instill in all social and business institutions of man a sense of interdependence, and a true appreciation of their responsibility toward the betterment of human

life everywhere. Social ecology is as important as natural ecology.

Colleges and universities are complex institutions, developed over many years and with origins in centuries of experience. It is true that many have been slow to respond to all demands for change. Some of these demands have resulted in positive change, while others have been totally impractical. Spontaneous and positive responses to the latter would have severely harmed and weakened the colleges and universities involved, to say nothing of the overall structure of higher education itself.

Colleges and universities must meet and move with demands which help in the development of social responsibility, and at the same time stimulate the intellectual growth of the individual.

Cooperative education, with its direct contact with reality, is uniquely suited to meeting these demands. It is now your duty as educated leaders to direct and further current-day movements in an intelligent and responsible manner. Consider carefully that which you feel should be changed. Certain concepts are useful, and should endure. Those which are not should be changed peacefully, and purposefully. Work that this world might more rapidly become a cleaner, freer place for all men and women.

Best of luck to you in the years ahead. God bless you in all your endeavors.

Go placidly amid the noise and haste, and remember what peace there may be in silence. As far as possible without surrender be on good terms with all versons. Speak your truth quietly and clearly and listen to others, even the dull and ignorant; they too have their story. Avoid loud and aggressive persons, they are vexations to the soul. If you compare yourself with others, you may become vain and bitter; for always there will be greater and lesser persons then yourself. Enjoy your achievements as well as your plans. Keep interested in your own career, however humble; it is a real possession in the changing fortunes of time. Exercise caution in your business affairs; for the world is full of trickery. But let this not blind you to what virtue there is; many persons strive for high ideals and everywhere life is full of heroism. Be yourself. Especially, do not feign affection. Neither be cynical about love; for in the face of all aridity and disenchantment it is as perennial as the grass. Take kindly the counsel of the years, gracefully surrendering the things of youth. Nurture strength of spirit to shield you in sudden misfortune. But do not distress yourself with imaginings. Many fears are born of fatigue and loneliness. Beyond a wholesome discipline, be gentle with yourself. You are a child of the Universe, no less then the trees and the stars; you have a right to be here. And whether or not it is clear to you, no doubt the universe is unfolding as it should. Therefore be at peace with God, whatever you conceive him to be, and whatever your labors and aspirations, in the noisy confusion of life keep peace with your soul. With all its sham, drudgery, and broken dreams, it is still a beautiful world. Be careful. Strive to be happy.

The realm of thought has been thoroughly explored by scholars dealing with questions of philosophy. However, the dynamics of change in society corollary to these changing patterns of thought has been largely ignored. Consequently, the historical process seemed to have achieved a character independent of human will or anticipation. A study of these dynamic relations is in order.

Thank you, staff of Cauldron '72. I think of the five college years as a unique slice of life with life's usual good points and bad points. Much was learned in and out of the classroom and co-op job. Learning was found to be a very never ending process. Many things would be done differently a second time, but overall it's been OK. Let's look ahead.

One thing Northeastern or perhaps any engineering school does is teach one how to think. How to think. For thought is the license and how can one deny it; for—it sets the motion for all that manifests electron to organism.

The innocence and simplicity of childhood attune one towards the imagination of youth and away from the realities of age. Listen and behold the vision of a child when young-without preconceived ideas-to find the truth and beauty in life. The child is the pedagogue of all humanity. The child instructs its elders in a manner which illuminates the mind to the sordidness of life; yet, turns the dark reality into an enlightened and meaningful experience. An experience which lends itself to an accumulation of knowledge; knowledge to build a better society and not to condemn the one we live in.

Fred Lehtonen

We have become, as Jaspers has pointed out, more concerned with the merely vital than with experiencing existence. In our pursuit of a higher standard of living we have done much to destroy the quality of life in this country.

I cannot answer. I just cry from my educated heart with educated tears and hope that my children will never understand why

Only why not.

Senior Index

The following is an alphabetical index, listing the seniors, their hometowns, their majors, and the page of the yearbook on which they are to be found. During five years at Northeastern, all classes, bills, rolls, meals, recitation sections, almost everything was in alphabetical or numerical order; most of our friends were consequently close to us in alphabet. Also, sometimes a person's major calls forth a sterotyped or prejudicial

view of his or her opinion.

Therefore we assembled the senior class pictures and statements in random order, free of any label except their names. For those who must find an individual senior, or who seek further information about an interesting face or statement, the index begins on the next page.
